Henri Charrière (French pronunciation: [ɑ̃ʁi ʃaʁiʁi]; 16 November 1906 ⓘ 29 July 1973) was a French writer, convicted as a murderer by the French courts. He wrote the novel Papillon, a memoir of his incarceration in and escape from a penal colony in French Guiana.

Henri Charrière - Wikipedia
Papillon (French: , lit. "butterfly") is an autobiographical novel written by Henri Charrière, first published in France on 30 April 1969. Papillon is Charrière's nickname. The novel details Papillon's purported incarceration and subsequent escape from the French penal colony of French Guiana (in reality he had never visited the island), and covers a 14-year period between 1931 and 1945.

This largely revised second edition comprehensively reviews the need and rationale for the integration of medical and dental patient data. The reader will find extensive guidance on issues involved with care and data integration, and how to achieve an integrated model of healthcare. The book discusses how the use of state-of-the-art, fully integrated (dental-medical), electronic health records can improve clinical, financial as well as societal outcomes. In the book you will also find different aspects that play a role in integration including existing clinical software implementations (and their paths for integration), clinical touch points, and how current and future developments will facilitate the integration process in a more efficient way. This second edition of Integration of Medical and Dental Care and Patient Data details the available methods and technologies for successfully integrating patient medical and dental data. It is, therefore, an important and timely update for informaticians and a broad range of both dental and medical professionals and other health professionals (dental assistants, hygienists, nurses) as well as clinical students entering the professional environment.

Robert Schumann is one of the most intriguing and enigmatic composers of the nineteenth century. Extraordinarily gifted in both music and literature, many of his compositions were inspired by poetry and novels. For much of his life he was better known as a music critic than as a composer. But whether writing as critic or composer, what he produced was created by him as a reflection of his often turbulent life. Best known was the tempestuous courtship of his future wife, the pianist Clara Wieck. Though marriage and family life seemed to provide a sense of constancy, he increasingly experienced periods of depression and instability. Mounting criticism of his performance as music director at Dusseldorf led to his attempted suicide in 1854. Schumann was voluntarily committed to an insane asylum near Bonn where, despite indications of improvement and dissatisfaction with his treatment, he spent the final two years of his life. Drawing on original research and newly published letters and journals from the time, author Eric Frederick Jensen presents a balanced portrait of the composer with both schotary authority and engaging clarity. Biographical chapters alternate with discussion of Schumann's piano, chamber, choral, symphonic, and operatic works, demonstrating how the circumstances of his life helped shape the music he wrote. Chronicling the romance of Robert and Clara, Jensen offers a nuanced look at the evolution of their relationship, one that changed dramatically after marriage. He also follows Schumann's creative musical criticism, which championed the burgeoning careers of Chopin, Liszt, and Brahms and challenged the musical tastes of Europe.

The book provides an authoritative source of knowledge about these problematic disorders. It bridges the gap between clinical recognition and the new molecular medicine. The editors, distinguished clinicians and geneticists, assembled an internationally renowned group of collaborators, many of them the experts who first described a particular disorder or established its present accepted definition. They have written a practical, comprehensive guide to the recognition, investigation and management of more than 60 recognised phakomatoses.
