The blind Country and Western singer recounts his difficult childhood, describes the highlights of his professional career, and discusses the people and events that contributed to his success

A journey beyond imagination is about to unfold. . . . It begins in the most boring place in the world: Chickentown, USA. There lives Candy Quackenbush, her heart bursting for some clue as to what her future might hold. When the answer comes, it ' s not one she expects. Welcome to the Abarat, a vast archipelago where every island is a different hour of the day. Candy has a place in this extraordinary land: She is here to help save the Abarat from the dark forces that are stirring at its heart—forces older than Time itself, and more evil than anything Candy has ever encountered. She ' s a strange heroine, she knows. But this is a strange world. And in the Abarat, all things are possible.

Sequel to Transylvania Sunrise wherein Radu Cinamar meets the Tibetan lama who orchestrated the discovery of ancient technology under the Romanian Sphinx

Written by Peter Moon and Radu Cinamar, a highly placed Romanian intelligence operative, this book heralds the most remarkable archaeological find in the annals of Mankind. Unbeknownst to most, there is an ancient sphinx located in the Bucegi Mountains of Romania. In 2003, the Pentagon discovered, through the use of satellite technology, an anomaly beneath this ancient sphinx. Through the highest levels of Freemasonry, the Pentagon was able to secure an alliance with the most secret department of the Romanian Intelligence Service which is known as Department Zero. Together, the Romanians and the Americans utilised the Pentagon's secret technology to penetrate a hidden chamber beneath the sphinx which was otherwise inaccessible to humans. What was discovered eventually was a holographic Hall of Records left by an advanced civilisation near three mysterious tunnels leading into the Inner Earth. The book chronicles the discovery of these modern day artefacts which represent the dawn of a new era for Mankind. Peter Moon is brought into the fold through his friend, Dr David Anderson, the mysterious scientist who founded the Time Travel Research Center on Long Island and also maintains a similar facility in Romania. Recognising that such satellite technology would had to have utilised Dr Anderson's proprietary space-time technology for maintaining satellites in orbit, Peter Moon pursues these matters further and accepts Dr Anderson's invitation to Romania where he visits the Romanian Sphinx and learns of a mysterious association between the mysterious time travel scientist and Radu Cinamar.

One of the most beloved vector graphic softwares among Web Designers is Adobe Illustrator. But getting to know all of its tools and features can be time consuming. With this eBook we try to ease the learning

A new edition of the first novel about much-loved character Little Wolf from the author of the MEERKAT MADNESS books and HARRY AND THE BUCKETFUL OF DINOSAURS.

These black-and-white illustrations represent the best of early 20th century American life drawing, offering exquisite examples of differing styles, techniques, and artistic expressions. An inspiring, invaluable collection.

An indispensable guide for anyone interested in improving and developing their fantasy art figures. Fantasy artists are unlikely to use models to draw from life but, to be successful, their creations must have a grounding in reality. This book by successful comic and fantasy artist Glenn Fabry, teaches you the principles of anatomy, from musculature and skeletal structure through to movement. You can then develop your artistic style by breaking and bending the rules of anatomy through practical exercises and demonstrations, accompanied by incredible finished artworks. The step-by-step exercises help you to fully understand the subtle movements that combine to create expressions, and the flowing movements that constitute actions. Anatomy for Fantasy Artists trains you in creating professional quality illustrations for comic book art, graphic novels, fantasy posters, sci-fi book covers and illustrations, and even computer games. In this book you will find valuable instruction from experts in the field, expanded from the original edition with additional pages that feature many more how-to, step-by-step illustrations. Instruction starts with the basics of human anatomical drawing and musculature, facial expressions, hands and body language, and then follows with a review of the principles of perspective and composition. Subsequent sections instruct on ways to distort, develop, and transform the human figure, giving it features that range from monstrous or magical to super-agile or larger than life, including dynamic poses for superheroes and villains, as well as fantasy female poses. Detailed artist's references and step-by-step instructions show how to build bodies that truly stretch the imagination. You also learn how to render characters in many different dynamic action poses, such as flying, spinning, punching, and jumping, as well as how to express each character's emotions through facial expressions. The cast of characters includes wizards, ogres, werewolves, winged avengers, goblins, aliens, enchantresses, barbarians, robots and more. Author Glenn Fabry is a successful comic book and fantasy artist who has spent many years working in this field including work for both DC and Marvel Comics. Through his professional experience he has honed his skills, which he generously shares in this book, alongside professional artists Michael Cunningham and Ben Cormac.
