Explores the basics of man's interaction with Earth

A man chases after a mysterious metal object that may not even exist — and his journey leads him on to ever-greater levels of madness, dissociation, and metaphysical conundrums. After ten years in a Zen monastery, Proteus knows it's time to leave. A troubled, solitary man, he knows what he seeks is not to be found sitting in meditation. His problem is that, during his time at the monastery, he's discovered something strange inside his mind: the ability to connect with a mysterious, silent, metallic spherical object he calls Mosquito. His connection to this possibly extraterrestrial object, which seems to dwell on an existential plane of its own, gives Proteus a flimsy sense of purpose. So when Mosquito abruptly disappears one day, Proteus can't bear the loss, and he sets off in pursuit of answers. Thus starts a surreal, philosophically maddening quest for meaning. Chasing the elusive Mosquito leads Proteus to in-between worlds where things do not quite hold together, and where the living and the dead must learn to live in and out of the boundaries of time. The further he gets from

sanity, the closer he comes to something that may turn out to be wisdom. Playful but unapologetically challenging, *New People of the Flat Earth* is a breathtakingly original novel that defies categorisation or summary.

Long ago the people of Dahomey told a tale of the days when the world was new, and the only Earth people were animals. They lived in cold and darkness because Mawu, the selfish Moon god, kept all the fire to herself. At last, little Chameleon and slow Tortoise, working together, found a way to outwit Mawu.

The first Black winner of the Nobel Prize in Literature gives us a tour de force, his first novel in nearly half a century: a savagely satiric, gleefully irreverent, rollicking fictional meditation on how power and greed can corrupt the soul of a nation. In an imaginary Nigeria, a cunning entrepreneur is selling body parts stolen from Dr. Menka's hospital for use in ritualistic practices. Dr. Menka shares the grisly news with his oldest college friend, bon viveur, star engineer, and Yoruba royal, Duyole Pitan-Payne. The life of every party, Duyole is about to assume a prestigious post at the United Nations in New York, but it now seems that someone is determined that he not make it there. And neither Dr. Menka nor Duyole knows why, or how close the enemy is, or how powerful. *Chronicles from the Land of the Happiest People on Earth* is at once a literary hoot, a crafty whodunit, and a scathing indictment of political and social corruption. It is a stirring call to arms against the abuse of power from one of our fiercest political activists, who also happens to be a global literary giant.
