been thoroughly revised and updated with the addition of many new example and practice problems. Information that is no longer utilized in the ever-changing field of pharmacy has been adapted or removed to reflect the most current aspects of pharmacy practice. The organized and concise layout of each chapter has been preserved with the use of applicable background information, example problems, Case-in-Point and Calculations Capsules, and practice problems at the end of the chapter. A new section, Applying Mathematical Principles to Pharmaceutical Calculations, has been added to Chapter 1 to assist student pharmacists in using basic mathematical skills acquired in prior education to solve current problems in the field of pharmacy. The Aliquot Method of Weighing and Measuring, presented in Chapter 3, has been revised in a stepwise approach to clarify a topic that proves to be somewhat confusing to student pharmacists" --Preface.

Retaining the successful previous editions' programmed instructional format, this book improves and updates an authoritative textbook to keep pace with compounding trends and calculations - addressing real-world calculations pharmacists perform and allowing students to learn at their own pace through examples. Connects well with the current emphasis on self-paced and active learning in pharmacy schools Adds a new chapter dedicated to practical calculations used in contemporary compounding, new appendices, and solutions and answers for all problems Maintains value for teaching pharmacy students the principles while also serving as a reference for review by students in preparation for licensure exams Rearranges chapters and rewrites topics of the previous edition, making its content ideal to be used as the primary textbook in a typical dosage calculations course for any health care professional Reviews of the prior edition: "...a well-structured approach to the topic..." (Drug Development and Industrial Pharmacy) and "...a perfectly organized manual that serves as a expert guide..." (Electric Review)
