computerized instrumentation.

The Sixth Edition includes a set of "computer-assisted experiments"

that allow students and

instructors to use this modern

equipment. This option also

allows instructors to find the

appropriate balance between

traditional and computer-based

experiments for their courses. By

analyzing data through two

different methods, students gain

a greater understanding of the

concepts behind the experiments.

The manual includes 14

integrated

experiments—computerized and

traditional—that can also be used

independently of one another.

Ten of these integrated

experiments are included in the

standard (bound) edition; four are available for customization.

Instructors may elect to customize the manual to include only those experiments they want. The bound volume includes the 33 most commonly used experiments that have appeared in previous editions; an additional 16 experiments are available for examination online. Instructors may choose any of these experiments—49 in all—to produce a manual that explicitly matches their course needs. Each experiment includes six components that aid students in their analysis and interpretation: Advance Study Assignment, Introduction and Objectives, Equipment Needed, Theory, Experimental Procedures, and
