The polar bear (*Ursus maritimus*) is a hypercarnivorous bear whose native range lies largely within the Arctic Circle, encompassing the Arctic Ocean, its surrounding seas and surrounding land masses. It is the largest extant bear species, as well as the largest extant predatory carnivore. A boar (adult male) weighs around 350–700 kg (770–1,540 lb), while a sow (adult female) is about half ...

[Polar bear - Wikipedia](#)

Polar bear, great white northern bear found throughout the Arctic region. Except for one subspecies of grizzly bear, the polar bear is the largest and most powerful carnivore on land. It has no natural predators and knows no fear of humans, making it an extremely dangerous animal.

[polar bear | Description, Habitat, & Facts | Britannica](#)

The polar bear is the world's largest living carnivore found across the Arctic ocean, in parts of Canada, Alaska, Russia, Greenland and Norway. It also possesses a remarkable sense of smell and will follow the trail of its prey or a mating partner for miles and days. These apex predators of the frozen landscape are particularly vulnerable to sea ice loss since their main prey - seals - require ...

Polar bears can also be exposed to toxic chemicals such as pesticides through their prey, which can affect a bear's biological functioning and ability to reproduce. Melting sea ice from climate change has increased human-polar bear conflicts when hungry polar bears go searching for food in the summer. Fortunately, people are learning to adapt ...

[Top 10 facts about polar bears | WWF](#)

The polar bear (*Ursus maritimus*) is the largest terrestrial carnivore in the world, rivaled in size only by the Kodiak bear. Polar bears play an important role in the life and culture of the Arctic Circle. Most people are familiar with polar bears from visiting zoos or seeing the bear depicted in the media, but there are many misconceptions about this fascinating animal.

[Polar Bear Facts: Behavior, Diet, Habitat, and More](#)

A polar bear might catch only one or two out of 10 seals it hunts, depending on the time of year and other variables. Their diet mainly consists of ringed and bearded seals because they need large amounts of fat to survive. Polar bears rely heavily on sea ice for traveling, hunting, resting, mating and, in some areas, maternal dens. But because ...

[Polar Bear | Species | WWF](#)

Polar bears also have black skin under their glistening coat, which helps them soak up the Sun's rays and keep warm. 4) These magnificent mammals have an incredible sense of smell which they use to track their favourite grub, seals\*. In fact, their sense of smell is so good, they can sniff out prey from up to 16km away! 5) Despite their size and bulk, polar bears are excellent swimmers, and ...

[10 facts about polar bears! | National Geographic Kids](#)

Polar bears are listed under a variety of classifications depending on international, national, and regional regulations. Internationally, they are listed as a vulnerable species by the IUCN. In Russia, polar bears are classified as a Red Data Book species, a listing that includes animals considered rare or endangered. In the U.S., polar bears are listed as a threatened species under the ...

[Polar Bear Facts & Information - Polar Bears International](#)

Polar bears live along shores and on sea ice in the icy cold Arctic. When sea ice forms over the ocean in cold weather, many polar bears, except pregnant females, head out onto the ice to hunt seals . Polar

## Download Ebook Polar Bears

bears primarily eat seals. Polar bears often rest silently at a seal's breathing hole in the ice, waiting for a seal in the water to surface.

"A moving story of abandonment, love, and survival against the odds."—Dr. Jane Goodall The heartbreaking and ultimately hopeful story of an abandoned polar bear cub named Nora and the humans working tirelessly to save her and her species, whose uncertain future in the accelerating climate crisis is closely tied to our own Six days after giving birth, a polar bear named Aurora got up and walked away from her den at the Columbus Zoo, leaving her tiny squealing cub to fend for herself. Hours later, Aurora still hadn't returned. The cub was furless and blind, and with her temperature dropping dangerously, the zookeepers entrusted with her care felt they had no choice: They would have to raise one of the most dangerous predators in the world by hand. Over the next few weeks, a group of veterinarians and zookeepers worked around the clock to save the cub, whom they called Nora. Humans rarely get as close to a polar bear as Nora's keepers got to their fuzzy charge. But the two species have long been intertwined. Three decades before Nora's birth, her father, Nanuq, was orphaned when an Inupiat hunter killed his mother, leaving Nanuq to be sent to a zoo. That hunter, Gene Agnaboogok, now faces some of the same threats as the wild bears near his Alaskan village of Wales, on the westernmost tip of the North American continent. As sea ice diminishes and temperatures creep up year after year, Agnaboogok and the polar bears—and everyone and everything else living in the far north—are being forced to adapt. Not all of them will succeed. Sweeping and tender, *The Loneliest Polar Bear* explores the fraught relationship humans have with the natural world, the exploitative and sinister causes of the environmental mess we find ourselves in, and how the fate of polar bears is not theirs alone.

Polar Bear has lost his underwear! Where could it be? There's only one thing to do: Remove the book's underwear-shaped bellyband to find the missing pair! Is that Polar Bear's underwear? No, it's Zebra's—see the colorful stripes? What about that itty-bitty pair? No, those belong to Butterfly! And so the search continues, with every page revealing an animal in eye-popping undies. This laugh-out-loud, one-of-a-kind novelty book from Japanese design talents tupera tupera will surprise and amuse children and their parents, all while affirming the importance of putting on your underwear.

Having seen a depressed polar bear in the zoo, Grandfather and his dog, Roo, set off on an expedition to find the last polar bears. After a treacherous journey on HMS Unsinkable, they reach Walrus Bay and the fun really starts. Howling wolves and terrible snowstorms delay the start of their trek and when they're on the way their tent is blown away by the fierce winds. They struggle on, hungry and cold to the top of Great Bear Ridge where they see the polar bears at last.
