slavery trauma and the creative investment of descendants of slaves in re-presenting traumatic family history.

Ponci Vicencio, the debut novel by Afro-Brazilian author Conceio Evaristo, is the story of a young Afro-Brazilian woman's journey from the land of her enslaved ancestors to the emptiness of urban life. However, the generations of creativity, violence and family cannot be so easily left behind as Ponci is heir to a mysterious psychic gift from her grandfather. Does this gift have the power to bring Ponci back from the emotional vacuum and absolute solitude that has overtaken her in the city? Do the elemental forces of earth, air, fire and water mean anything in the barren urban landscape? This mystical story of family,

dreams and hope by the incomparable Evaristo, illuminates aspects of urban and rural Afro-Brazilian conditions with poetic eloquence and raw urgency.

A história de Ponciá Vicêncio descreve os caminhos, as andanças, as marcas, os sonhos e os desencantos da protagonista. A autora traça a trajetória da personagem da infância à idade adulta, analisando seus afetos e desafetos e seu envolvimento com a família e os amigos. Discute a questão da identidade de Ponciá, centrada na herança identitária do avô e estabelece um diálogo entre o passado e o presente, entre a lembrança e a vivência, entre o real e o imaginado.

The sites from which postcolonial cultural articulations develop and

the sites at which they are received have undergone profound transformations within the last decades. This book traces the accelerating emergence of cultural crossovers and overlaps in a global perspective and through a variety of disciplinary approaches. It starts from the premise that after the ' spatial turn ' human action and cultural representations can no longer be grasped as firmly located in or clearly demarcated by territorial entities. The collection of essays investigates postcolonial articulations of various genres and media in their spatiality and locatedness while envisaging acts of location as dynamic cultural processes. It explores the ways in which critical spatial thinking can be made Productive: Testing the uses and limitations of ' translocation ' as an open exploratory model for a critically spatialized postcolonial studies, it covers a wide range of cultural expressions from the anglophone world and beyond – literature, film,

TV, photography and other forms of visual art, philosophy, historical memory, and tourism. The extensive introductory chapter charts various facets of spatial thinking from a variety of disciplines, and critically discusses their implications for postcolonial studies. The Contributors' essays range from theoretical interventions into the critical routines of postcolonial criticism to case studies of specific cultural texts, objects, and events reflecting temporal and spatial, material and intellectual, physical and spiritual mobility. What emerges is a fascinating survey of the multiple directions postcolonial translocations can take in the future. This book is aimed at students and scholars of postcolonial literary and cultural studies, diaspora studies, migration studies, transnational studies, globalisation studies, critical space studies, urban studies, film studies, media studies, art history, philosophy, history, and anthropology. Paloma Martinez-Cruz argues that the medicine traditions of Mesoamerican women constitute a hemispheric intellectual lineage that continues to thrive despite the legacy of colonization. Martinez-Cruz asserts that indigenous and mestiza women healers are custodians of a knowledge base that remains virtually uncharted. The few works looking at the knowledge of women in Mesoamerica generally examine only the written—even academic—world, accessible only to

the most elite segments of (customarily male) society. These works have consistently excluded the essential repertoire and performed knowledge of women who think and work in ways other than the textual. And while two of the book's chapters critique contemporary novels, Martinez-Cruz also calls for the exploration of non-textual knowledge transmission. In this regard, the book's goals and methods are close to those of performance scholarship and anthropology, and these methods reveal Mesoamerican women to be public intellectuals. In *Women and Knowledge in Mesoamerica*, fieldwork and ethnography combine to reveal women healers as models of agency. Her multidisciplinary approach allows Martinez-Cruz to disrupt Euro-based intellectual hegemony and to make a case for the epistemic authority of Native women. Written from a Chicana perspective, this study is learned, personal, and engaging for anyone who is interested in

the wisdom that prevailing analytical cultures have deemed “unintelligible.” As it turns out, those who are unacquainted with the sometimes surprising extent and depth of wisdom of indigenous women healers simply haven’t been looking in the right places—outside the texts from which they have been consistently excluded.

In this interdisciplinary volume, contributors analyze the expression of Latina/o cultural identity through performance. With music, theater, dance, visual arts, body art, spoken word, performance activism, fashion, and street theater as points of entry, contributors discuss cultural practices and the fashioning of identity in Latino/a communities throughout the US. Examining the areas of crossover between Latin and American cultures gives new meaning to the notion

The North Atlantic development establishment has had a blemished track record over the past 65 years. In addition to a sizeable portfolio of failure, the few economic success stories in the developing world, such as South Korea and China, have been achieved by rejecting the advice of Western experts. Despite these realities, debates within mainstream development studies have stagnated around a narrow, acultural emphasis on institutions or the size and role of government. *Cultures of Development* uses a contrapuntal comparison of Vietnam and Brazil to show why it is important for development scholars and practitioners to broaden their conceptualization of economies to

include the socio-cultural. This smartly written book based on original, ethnographic research breathes new life into development studies by bringing cultural studies into conversation with development studies, with an emphasis on improving—rather than merely critiquing—market economies. The applied deployment of critical development studies, i.e., interpretive economics, results in a number of theoretical advances in both development and areas studies, demonstrating the economic importance of certain kinds of cultural work carried out by religious leaders, artists, activists, and educators. Most importantly, the reader comes to fully appreciate how economies are embedded within the subjectivities, discourses, symbols, rituals, norms, and values of a given society. This pioneering book revives development practice and policy by offering fresh insights and ideas about how development can be advanced. It will be of special interest
