World War I has come down to us in indelible images—those of airplane bombers, bleak-eyed soldiers, stern-faced commanders, and the ruins of countless villages. But soldiers themselves also took photographs on the battlefield, and many of their striking images were transformed into postcards that were sent home to family and friends or collected as war mementos.

Image #3 The German postcard (Image #3) is a real photo, printed directly onto a blank card pre-marked with message and address lines. This was a common technique for sending personal photographs to loved ones, and was probably taken by an enterprising photographer, wandering among the holiday makers.

"The postcards in this book give a unique insight into the soldiers' daily lives. We see wounded men smiling obligingly for the camera, snatching a meal while standing in the trenches, and setting up 'home' in a newly captured enemy trench."--Back cover.

German art student Otto Schubert was 22 years old when he was drafted into the Great War. As the conflict unfolded, he painted a series of postcards that he sent to his sweetheart, Irma. During the battles of Ypres and Verdun, Schubert filled dozens of military-issued 4 " x 6 " cards with vivid

Images depicting the daily realities and tragedies of war. Beautifully illustrated with full-color reproductions of his exquisite postcards, as well as his wartime sketches, woodcuts, and two lithograph portfolios, Postcards from the Trenches is Schubert's war diary, love journal, and life story. His powerful artworks illuminate and document in a visual language the truths of war. Postcards from the Trenches offers the first full account of Otto Schubert, soldier-artist of the Great War, rising art star in the 1920s, prolific graphic artist and book illustrator, one of the “ degenerate ” artists defamed by the Nazis, and a man shattered by the Second World War and the Cold War. Created in the midst of enormous devastation, Schubert's haunting visual missives are as powerful and relevant today as they were a century ago. His postcards are both a young man's token of love and longing and a soldier's testimony of the

Great War. **Please note that this will work best on a colour device**

In *Postcards from the Trenches*, Allyson Booth traces the complex relationship between British Great War culture and modernist literature and architecture. By drawing on a wide range of materials and attending to the places where they overlap, Booth uncovers ways in which modernism is deeply embedded in a broader Great War culture. She links, for example, the modernist representation of an unstable self to soldiers' familiarity with corpses, the modernist mistrust for fact to the competing nationalist discourses of August 1914, and the modernist description of buildings as having shaken off the past to a desire to forget the war. Booth argues that the dislocations of war often figure centrally in modernist forms even when the war itself seems peripheral to modernist content.

Thus she suggests that soldiers experienced the Great War as strangely modernist and that modernism itself is strangely haunted by the Great War.

Postcards sent by men on the front, and to them by their families, are among the most numerous, and most telling, surviving artefacts of the Great War. They tell us much about attitudes towards the war, and provide a great insight into men's lives, and into the thoughts and emotions of those left behind. Very different in their illustration, and in their writing, between the beginning of the war and the end, postcards provide a social history of the war in microcosm. Illustrated with a wide range of postcards, this is a fascinating look into the response of the British people to the horrors of the war.

Visual methods such as drawing, painting, video, photography and hypermedia offer

Increasingly accessible and popular resources for ethnographic research. In *Working Images*, prominent visual anthropologists and artists explore how old and new visual media can be integrated into contemporary forms of research and representation. Drawing upon projects undertaken both 'at home' in their native countries and abroad in locations such as Ethiopia and Venezuela, the book's contributors demonstrate how visual methods are used in the field, and how these methods can produce and communicate knowledge about our own and other cultures. As well as focusing on key issues such as ethics and the relationship between word and image, they emphasize the huge range of visual methods currently opening up new possibilities for field research, from cartoons and graphic art to new media such as digital video and online technologies.

"World War I and American Art provides an unprecedented look at the ways in which American artists reacted to the war. Artists took a leading role in chronicling the war, crafting images that influenced public opinion, supported mobilization efforts, and helped to shape how the war's appalling human toll was memorialized. The book brings together paintings, drawings, prints, photographs, posters, and ephemera, spanning the diverse visual culture of the period to tell the story of a crucial turning point in the history of American art"--

Human displacement has always been a consequence of war, written into the myths and histories of centuries of warfare. However, the global conflicts of the twentieth century brought displacement to civilizations on an unprecedented scale, as the two World Wars shifted participants around the globe. Although driven by

political disputes between European powers, the consequences of Empire ensured that Europe could not contain them. Soldiers traversed continents, and civilians often followed them, or found themselves living in territories ruled by unexpected invaders. Both wars saw fighting in Europe, Africa, the Middle East and the Far East, and few nations remained neutral. Both wars saw the mass upheaval of civilian populations as a consequence of the fighting. Displacements were geographical, cultural, and psychological; they were based on nationality, sex/gender or age. They produced an astonishing range of human experience, recorded by the participants in different ways. This book brings together a collection of inter-disciplinary works by scholars who are currently producing some of the most innovative and influential work on the subject of displacement in war, in order to share their knowledge and

Interpretations of historical and literary sources. The collection unites historians and literary scholars in addressing the issues of war and displacement from multiple angles. Contributors draw on a wealth of primary source materials and resources including archives from across the world, military records, medical records, films, memoirs, diaries and letters, both published and private, and fictional interpretations of experience.

Snapshots taken by American soldiers of Iraqi prisoners stripped naked, humiliated and tortured shocked the world in 2004 and more have followed from the conflict in Afghanistan, but whether the public have been horrified by the soldiers' conduct or the fact they have taken pictures has not been clear. In fact, as this remarkable book reveals and relates, soldiers have taken photographs of war and its atrocities for

more than 100 years. But their pictures are private, intended mainly for the soldiers themselves, as mementoes or as attempts to make sense of the chaos, brutality and boredom of war. They can be gruesome or sociable, shocking or mundane and they are seldom regarded as serious contributions to a visual culture of war, which since 1939 has been dominated by professional war photography. But with the 21st-century shift to simple digital photography, transmission by the internet available to all, and a new 'citizen journalism', soldiers' pictures are acquiring a new resonance. "Private Pictures" traces this unacknowledged genre of photography from the origins of popular photography in the Boer War through to the present day; it discusses how the images have been used and it asks: what effect might the wider appreciation of soldiers' pictures have on the popular perception of war?

Could your ancestors write their own names or did they mark official documents with a cross? Why did great-grandfather write so cryptically on a postcard home during the First World War? Why did great-grandmother copy all the letters she wrote into letter-books? How unusual was it that great-uncle sat down and wrote a poem, or a memoir? Researching Family History Through Ancestors' Personal Writings looks at the kinds of (mainly unpublished) writing that could turn up amongst family papers from the Victorian period onwards - a time during which writing became crucial for holding families together and managing their collective affairs. With industrialization, improved education, and far more geographical mobility, British people of all classes were writing for new purposes, with new implements, in new styles, using new modes of expression and new methods of communication (e.g. telegrams and

postcards). Our ancestors had an itch for scribbling from the most basic marks (initials, signatures and graffiti on objects as varied as trees, rafters and window ledges), through more emotionally charged kinds of writing such as letters and diaries, to more creative works such as poetry and even fiction. This book shows family historians how to get the most out of documents written by their ancestors and, therefore, how better to understand the people behind the words.
