A must for all wanting to use natural means for preventing or treating high blood pressure, blocked arteries, cancer, chronic fatigue, diabetes, osteoporosis, and many other afflictions. Provides information that minimizes the use of prescription drugs, diet fads, and their accompanying side effects. Highly illustrated in full color, this tome of information is designed to be readable and easy-to-understand. Singular case studies, which can be misleading, are not used. Instead, the results of a host of scientific studies conducted around the world are cited, many of which involve large groups of individuals with widely varying lifestyles. Many topics are covered such as how to strengthen the immune system, overcome addictions, increase

This User ' s Guide is a resource for investigators and stakeholders who develop and review observational comparative effectiveness research protocols. It explains how to (1) identify key considerations and best practices for research design; (2) build a protocol based on these standards and best practices; and (3) judge the adequacy and completeness of a protocol. Eleven chapters cover all aspects of research design, including: developing study objectives, defining and refining study questions, addressing the heterogeneity of treatment effect, characterizing exposure, selecting a comparator, defining and measuring outcomes, and identifying optimal data sources. Checklists of guidance and key considerations for protocols are provided at the end of each chapter. The User ' s Guide was created by researchers affiliated with AHRQ ' s Effective Health Care Program, particularly those who participated in AHRQ ' s DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews. More more information, please consult the Agency website: www.effectivehealthcare.ahrq.gov)

In what promises to be the trial of the century, attorney-turned-author James Henderson indicts the medical/industrial cartel now dominating modern drug-based medicine for trading the health of millions of Americans for dollars. In the brilliant and intriguing setting of a jury trial the author enrolls We the People of America into a vast national jury to pass judgment on modern pharmaceutical medicine for

cunningly treating chronic degenerative diseases like heart disease, cancer, and diabetes Americas leading killers by merely seeking to manage the symptoms of these diseases, not even attempting to cure them. Drug-based medicine has become big business. It thrives on sickness. It dares not cure the patient or the money pipe-line dries up. The price tag? Overt two trillion dollars annually and climbing. And America is getting sicker by the day. Author James Henderson offers the proven testimonies of eminent nutritional physicians and medical geniuses who have turned their backs on this criminal monopoly. These brave souls have risked their careers to blow the whistle on the drugging of America. In this court of public opinion, if we, the jury, cannot discern the truth, what hope is there for justice? Or for medical freedom in America? Will We the People make a decision before its too late? Read Indicted! and decide for yourself.

“ Fugitive speeds along well over the posted limit. ” —Portland Oregonian “ Margolin knows how to pack in the thrills. ” —Tess Gerritsen In Fugitive, New York Times bestseller Phillip Margolin brings back his most popular protagonist, attorney Amanda Jaffee, star of Wild Justice, Proof Positive, and other spellbinding thrillers. Fugitive ensnares Amanda in a dangerous web of secrets and death when she becomes professionally involved with a con man and possible murderer who ’ s been targeted by an insane and relentless African despot. With page after page of breathtaking excitement that never lets up, Fugitive is Phillip Margolin at his very best, featuring the trademark twists and intensity that inspired the Seattle Post-Intelligencer to proclaim him “ A master of heart-pounding suspense. ”

In the past decade, few subjects at the intersection of medicine and sports have generated as much public interest as sports-related concussions - especially among youth. Despite growing awareness of sports-related concussions and campaigns to educate athletes, coaches, physicians, and parents of young athletes about concussion recognition and management, confusion and controversy persist in

many areas. Currently, diagnosis is based primarily on the symptoms reported by the individual rather than on objective diagnostic markers, and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity. Sports-Related Concussions in Youth: Improving the Science, Changing the Culture reviews the science of sports-related concussions in youth from elementary school through young adulthood, as well as in military personnel and their dependents. This report recommends actions that can be taken by a range of audiences - including research funding agencies, legislatures, state and school superintendents and athletic directors, military organizations, and equipment manufacturers, as well as youth who participate in sports and their parents - to improve what is known about concussions and to reduce their occurrence. Sports-Related Concussions in Youth finds that while some studies provide useful information, much remains unknown about the extent of concussions in youth; how to diagnose, manage, and prevent concussions; and the short- and long-term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms. The culture of sports negatively influences athletes' self-reporting of concussion symptoms and their adherence to return-to-play guidance. Athletes, their teammates, and, in some cases, coaches and parents may not fully appreciate the health threats posed by concussions. Similarly, military recruits are immersed in a culture that includes devotion to duty and service before self, and the critical nature of concussions may often go unheeded. According to Sports-Related Concussions in Youth, if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered, then the culture in which these athletes perform and compete will become much safer. Improving understanding of the extent, causes, effects, and prevention of sports-related concussions is vitally important for the health and well-being of youth athletes. The findings and recommendations in this report set a direction for
