The proceedings of the 2017 Symposium on Chaos, Complexity and Leadership illuminate current research results and academic work from the fields of physics, mathematics, education, economics, as well as management and social sciences. The text explores chaotic and complex systems, as well as chaos and complexity theory in view of their applicability to management and leadership. This proceedings explores non-linearity as well as data-modelling and simulation in order to uncover new approaches and perspectives. Effort will not be spared in bringing theory into practice while exploring leadership and management-laden concepts. This book will cover the analysis of different chaotic developments from different fields within the concepts of chaos and complexity theory. Researchers and students in the field will find answers to questions surrounding these intertwined and compelling fields.

Eddie Gibbs candidly analyzes new church models while proposing nine areas in which the church will need to transform to be biblically true to its message and mission.

In **If This Is the Way the World Works** **William O. Avery** and **Beth Ann Gaede** ask two primary questions: First, what principles from science are so broadly accepted that scientists themselves are willing to say, "This is the way the world works"? Second, how do congregations and their leaders behave when they operate in concert with these seemingly universal principles? **Avery** and **Gaede** explore five principles form the philosophy of science that suggest an alternative way to view congregational mission and leadership: openness to new information, complexity, diversity, interrelatedness, and process. Their premise is that when faith communities align themselves with the way the world—God's world—works, they more faithfully carry out their vocations as witnesses to God's reconciling work and as servants to one another. By following these basic scientific principles, **Avery** and **Gaede** argue, we arrive at a different view of leadership in the church. If this is truly the way the world works, leaders will find strength through relationships, hope in diversity, and above all trust in the love of God.

In this volume the third book in the **Missional Church** series eminent missional church expert **Craig Van Gelder** continues to track and contribute to the expanding missional church conversation, inviting today's brightest minds in the field to speak to key questions concerning church leadership.

This volume is the first major study of the papacy as a managerial structure that has evolved over two thousand years. Special emphasis is placed on the environments in which the Church functioned and in which it had to reach uneasy compromises. The volume is both scholarly and very readable.

All religions follow the same principles and you will know them in this book. These are principles that transpose time and have been in existence for thousand of years. And once you see how simple they are to apply, you will finally be able to form your own group and expand your awareness with others, while creating valuable connections that will expand your influence as a spiritual leader. The information presented here is based on the direct experience with dozens of different religious congregations, from the most popular to the most secretive and selective.

Leadership By Divine Design: How to Be An Effective Christian Leader is another significant work by **Anthony Osuobeni**, author of the seminal book on revival, **Hashtag Revival**. He writes to add his voice to the vast body of literature on Christian leadership, highlighting believers' call to leadership in the Body of Christ. He encourages believers, pastors and church leaders, to see leadership the way God sees it and to practice it in their churches according to divine dictates. Because the more people we lead the more leaders we need, we must prioritize on developing leaders in our congregations and populate the ministerial landscape with effective Christian leaders. Finally, **Anthony** prays that God's people in the churches of Christ all over the world will become God's designer-leaders. The book is purposeful, practical and on point!

• **Bishop of the Episcopal Diocese of Texas** and author of **Unabashedly** **Episcopalian**: has the authority to call for change to hierarchical structures • **Practical ideas** for connecting and building communities of service **Bishop** **Andy** **Doyle** understands that the church must change. Every day, he presides over parishes that are no longer vital, that have not adapted to the "VUCA" (volatile, uncertain, complex, and ambiguous) world of today — the world in which the church exists. The church still looks to hierarchies when it needs to build networks, and stays mired in arguments when it needs to find unity. With the experience of a bishop and the insight of a deep learner, **Doyle** points the way to the future with a vision for how we can learn, serve, and communicate with each other. For clergy, vestries, seminaries, commissions, and, ultimately, parishioners
