This text is intended as a guide for lifeguards, for lifeguard training instructors, and for managers of aquatic facilities who want to establish a system for selecting, training, and using lifeguards ... This text focuses on the skills and knowledge an individual requires to properly assume lifeguarding responsibilities at a swimming pool, water park, or a protected (nonsurf) open-water beach. This text emphasizes that additional training will need to be provided by aquatic facilities where lifeguards are employed. -Chap. 1.

This New American Red Cros CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

Covers lifeguarding responsibilities along with information on such topics as rescue breathing, CRP and AED, supplemental oxygen support, spinal injury management, handling risks, and professionalism.

Discusses the history and techniques of swimming and diving, safety rescue techniques, and skills for a variety of aquatic activities.

Presents a training guide to becoming a safe, responsible, and successful babysitter, focusing on what to do when children suffer different kinds of accidents and illnesses.
