If smithing an item would increase the player's respect over 100%, any extra respect is lost; for example, if a player has 99% respect, and smiths an item that gives 30,000 experience, they will have 100% respect after completing the item, not 102%.

The workplace has become a hotbed of social toxicity - from the #MeToo movement to WeWork, it's clear that abusive bosses and entrenched cultures of discrimination have become more prevalent than ever. Such behaviour is not only simply wrong and damaging to its victims - it also results in reduced productivity, higher employee turnover, and can often leave a stain upon the wider reputation of an organization. In Toxic, Clive Lewis draws upon his decades of experience in HR and mediation to distill the problems and underlying causes of toxic workplaces before tackling the issue head-on. He draws upon first-hand case studies from an eclectic array of workplaces (from corporate offices to hospitals) to demonstrate how toxicity can be both prevented and resolved. This is a practical guide for business leaders and HR professionals looking to preserve a peaceful workplace, while also providing tips for employees looking to remain productive and focused when working with troublesome colleagues in difficult environments.
