“All it takes to become an artist is to start doing art.” –from *On Becoming an Artist* On *Becoming an Artist* is loaded with good news. Backed by her landmark scientific work on mindfulness and artistic nature, bestselling author and Harvard psychologist Ellen J. Langer shows us that creativity is not a rare gift that only some special few are born with, but rather an integral part of everyone's makeup. All of us can express our creative impulses—authentically and uniquely—and, in the process, enrich our lives. Why then do so many of us merely dream of someday painting, someday writing, someday making music? Why do we think the same old thoughts, harbor the same old prejudices, stay stuck in the same old mud? Who taught us to think “inside the box”? No one is more qualified to answer these questions than Dr. Langer, who has explored their every facet for years. She describes dozens of fascinating experiments—her own and those of her colleagues—that are designed to study mindfulness and its relation to human creativity, and she shares the profound implications of the results—for our well-being, health, and happiness. Langer reveals myriad insights, among them: We think we should already know what only firsthand experience can teach us. . . . In learning the ways that all roses are alike, we risk becoming blind to their differences. . . . If we are mindfully creative, the circumstances of the moment will tell us what to do. . . . Those of us who are less evaluatively inclined experience less guilt, less regret, less blame, and tend to like ourselves more. . . . Uncertainty gives us the freedom to discover meaning. . . . Finally, what we think we're sure of may not even exist. With the skill of a gifted logician, Langer demonstrates exactly how we undervalue ourselves and undermine our creativity. By example, she persuades us to have faith in our creative works, not because someone else approves of them but because they're a true expression of ourselves. Her high-spirited, challenging book sparkles with wit and intelligence and inspires in us an infectious enthusiasm for our creations,

our world, and ourselves. It can be of lifelong value to everyone who reads it.

"A mightily telling book!" John Pilger
Big Tech is shutting down the left and the right. Digital propaganda is telling you how to think and what to think about. In this new book, Dr. T.J. Coles exposes the hidden hands behind Wikipedia: the encyclopedia that anyone can use and anyone can edit. But who--other than paid trolls and dedicated PR operatives--has the time in our neoliberal capitalist order to spend all day editing and re-editing Wikipedia? With big money from big banks and big oil, the Wikimedia Foundation shapes the faux liberal culture that smears peace activists, attacks dissident journalists, hides the truth about nuclear weapons, distorts facts on climate change, and promotes US-led wars of aggression. The book also documents the Google-YouTube-Wiki axis that creates thought bubbles and attempts to discredit outside thinkers. The book calls for the democratization of information and frames the issue as a class struggle.

Book 3 in the Inked in the Steel City Series

This mind-opening take on indigenous psychology presents a multi-level analysis of culture to frame the differences between Chinese and Western cognitive and emotive styles. Eastern and Western cultures are seen here as mirror images in terms of rationality, relational thinking, and symmetry or harmony. Examples from the philosophical texts of Confucianism, Daoism, Buddhism, and classical poetry illustrate constructs of shading and nuancing emotions in contrast to discrete emotions and emotion regulation commonly associated with traditional psychology. The resulting text offers readers bold new understandings of emotion-based states both familiar (intimacy, solitude) and unfamiliar (resonance, being spoiled rotten), as well as larger concepts of freedom, creativity, and love. Included among the topics: The mirror universes of East and West. In the crucible of Confucianism. Freedom and emotion: Daoist recipes for authenticity and creativity. Chinese creativity, with special focus on solitude and its seekers. Savoring, from aesthetics to the everyday. What is an emotion? Answers from a wild garden of knowledge. Understanding Emotion in Chinese Culture has a wealth of research and study potential for undergraduate and graduate courses in affective science, cognitive psychology, cultural and cross-cultural psychology, indigenous psychology, multicultural studies, Asian psychology, theoretical and philosophical psychology, anthropology, sociology, international psychology, and regional studies.

This is the third in a series dealing with the concept of self and its importance in understanding Chinese, Japanese, and Indian cultures. The authors examine the relationship between self and image and its significance in attaining a deeper knowledge of Chinese, Japanese, and Indian cultures. The relationship between self and image is as complex as it is fascinating. It takes on different meanings and significances in diverse cultures. In this volume, the focus of attention is largely on representational practices and symbolic media, such as literature, cinema, art, and dance. By examining both classical and contemporary works associated with China, India, and Japan, the authors seek, on the one hand, to demonstrate the intricate relationship between self and image and, on the other, to make use of that relationship to further our understanding of these cultures.
