The dramatic account of a Revolutionary-era conspiracy in which a band of farmers opposed to military conscription and fearful of religious persecution plotted to kill the governor of North Carolina. Less than a year into the American Revolution, a group of North Carolina farmers hatched a plot to assassinate the colony's leading patriots, including the governor. The scheme became known as the Gourd Patch or Llewellen Conspiracy. The men called themselves the Brethren. The Brethren opposed patriot leaders' demand for militia volunteers and worried that 'enlightened' deist principles would be enshrined in the state constitution, displacing their Protestant faith. The patriots' attempts to ally with Catholic France only exacerbated the Brethren's fears of looming heresy. Brendan McConville follows the Brethren as they draw up plans for violent action. After patriot militiamen threatened to arrest the Brethren as British sympathizers in the summer of 1777, the group tried to spread false rumors of a slave insurrection in hopes of winning loyalist support. But a disaffected insider denounced the movement to the authorities, and many members were put on trial. Drawing on contemporary depositions and legal petitions, McConville gives voice to the conspirators' motivations, which make clear that the Brethren did not back the Crown but saw the patriots as a grave threat to their religion. Part of a broader Southern movement of conscription resistance, the conspiracy compels us to appreciate the full complexity of public opinion surrounding the Revolution. Many colonists were neither loyalists nor patriots and came to see the Revolutionary government as coercive. The Brethren tells the dramatic story of ordinary people who came to fear that their Revolutionary leaders were trying to undermine religious freedom and individual liberty. The very causes now ascribed to the Founding generation.

This book deals with some aspects of the future shape of the socio-economic order which would be founded on sustainability principles and the role of law therein, instead of on the prevailing capitalist economic order. The volume elaborates in particular on how innovation, a crucial aspect of free-market capitalism and its laws which constitute the current socio-economic order, could result in a more sustainable economy which, in turn, could lead to a more sustainable society. Moreover, the book analyses current developments in financial and economic law and evaluates their perks, risks and sustainability levels. The book contains no less than 11 chapters in which a variety of experts share their state-of-the-art insights regarding specific domains of socio-economic life. As such, the book deals with topics that are at present fully under debate in societies, such as student credit and the dangers it entails, cryptocurrencies and how the law tries to regulate this basically private law instrument, groups of companies under Belgian (company) law, a proposal for improving the international monetary system, and seeds and intellectual property rights, besides various other similar themes. The book forms the latest volume of the book series Economic and Financial Law & Policy - Shifting Insights & Values, and fully complies with the series' goal of critically examining the legal methods and mechanisms that shape the global free markets and proposing alternatives to them. The book will hereby prove a valuable instrument for all researchers investigating these matters, besides policymakers and their advisers as well as all lawyers active in the field of economic law who look for a new perspective on the subject matters dealt with.

Exile was a potent form of punishment and a catalyst for change in colonial Asia between the seventeenth and early twentieth centuries. Vast networks of forced migration supplied laborers to emerging colonial settlements, while European powers banished rivals to faraway locations. Exile in Colonial Asia explores the phenomenon of exile in ten case studies by way of three categories: "kings," royals banished as political exiles; "convicts," the vast majority of those whose lives are explored in this volume, sent halfway across the world with often unexpected consequences; and "commemoration," referring to the myriad ways in which the experience and its aftermath were remembered by those exiled, relatives left behind, colonial officials, and subsequent generations of descendants, devotees, historians, and politicians. Intended for a broad readership interested in the colonial period in Asia (South and Southeast Asia in particular), the volume encompasses a range of disciplinary perspectives: anthropology, gender studies, literature, history, and Asian, Australian, and Pacific studies. In addition to presenting fascinating, little-known, and varied case studies of exile in colonial Asia and Australia, the chapters collectively offer a sweeping, contextualized, comparative approach that links the narratives of diverse peoples and locales. Rather than confining research to the European colonial archives, whenever possible the authors put special emphasis on the use of indigenous primary sources hitherto little explored. Exile in Colonial Asia invites imaginative methodological innovation in exploring multiple archives and expands our theoretical frontiers in thinking about the interconnected histories of penal deportation, labor migration, political exile, colonial expansion, and individual destinies.

This is the Book of the Century! At LAST someone - this time a basic research scientist - has come forth with proof of cataclysms, which are worldwide supersonic inundations such as Noah's flood. They were discovered by great men such as Andre DeLuc, Baron Georges Cuvier and Guy de Dolomieu, and have remained unsolved mysteries ever since. Now the author takes you through thrilling solutions of finding the process of catclysms, their timetable, and the derivation of trigger, a 20-year search. Truly, CATACLYSMS LEAVE NO ONE UNTOUCHED! The Second Edition of Curriculum Theory: Conflicting Visions and Enduring Concerns by Michael Stephen Schiro presents a clear, unbiased, and rigorous description of the major curriculum philosophies that have influenced educators and schooling over the last century. The author analyzes four educational visions—Scholar Academic, Social Efficiency, Learner Centered, and Social Reconstruction—to enable readers to reflect on their own educational beliefs and more productively interact with educators who might hold different beliefs.

Popular opinion suggests that information has become a distinguishing feature of the modern world. Where once economies were built on industry and conquest, we are now instead said to be part of a global information economy. In this new and thoroughly revised edition of his popular book, author Webster brings his work up-to-date both with new theoretical work and with social and technological changes - such as the rapid growth of the internet and accelerated globalization - and reassesses the work of key theorists in light of these changes. This book is essential reading for students of contemporary social theory and anybody interested in social and technological change in the post-war era.

Standard text for teachers and students of political anthropology.
