The Psycho-Analysis of Children, first published in 1932, is a classic in its subject, and revolutionised child analysis. Melanie Klein had already proved, by the special technique she devised, that she was a pioneer in that branch of analysis. She made possible the extension of psycho-analysis to the field of early childhood, and in this way not only made the treatment of young children possible but also threw new light on psychological development in childhood and on the roots of adult neuroses and psychoses.

A fifth of West Germany's post-1945 population consisted of ethnic German refugees expelled from Eastern Europe, a quarter of whom came from Silesia. As the richest territory lost inside Germany's interwar borders, Silesia was a leading objective for territorial revisionists, many of whom were themselves expellees. The Lost German East examines how and why millions of Silesian expellees came to terms with the loss of their homeland. Applying theories of memory and nostalgia, as well as recent studies on ethnic cleansing, Andrew Demshuk shows how, over time, most expellees came to recognize that the idealized world they mourned no longer existed. Revising the traditional view that most of those expelled sought a restoration of prewar borders so they could return to the east, Demshuk offers a new answer to the question of why, after decades of violent upheaval, peace and stability took root in West Germany during the tense early years of the Cold War.
