Scientific Steps. Presentation. Investigation. The key to a good and manageable investigation is to choose a topic of interest, then ask what is called a “testable question.” Testable questions are those that can be answered through hands-on investigation by the student. The key difference between a general interest science question and a testable question is that testable questions are always about changing one thing to see what the effect is on another thing.

The articles explore all aspects of getting ready for a science fair. You'll learn how to help students pick their projects, understand what makes for fair judging, and create innovative alternatives. Highly practical and wide-ranging, Science Fairs may be the only guide you'll ever need to run successful fairs at your school.

Provides detailed information regarding creating and presenting successful science fair projects on topics including physiology, botany, chemistry, and astronomy.

Suggests science projects involving electricity, light, sound, biology, chemistry, weather, and ecology.

Educational resource for teachers, parents and kids!

Offers step-by-step instructions for a hands-on learning experience for children in grades 2-5 who are doing science fair projects.

Unlock the secrets of circuits, batteries, and magnets! Learn all about current, static charges, motors, and more! All you need are some common household materials. If you are interested in competing in a science fair, you can get many great ideas that will help you create a unique, award-winning science project.

Your personal coach and game plan for creating a unique and award-winning science fair project
Developing a science fair project from the ground up can be a daunting task--and today's science fairs are

more competitive than ever before. The Complete Workbook for Science Fair Projects takes you step by step through the entire process of brainstorming, finding, completing, and submitting an award-winning science fair project of your very own. The special features of this easy-to-use, interactive workbook include: Complete instructions and fun, meaningful exercises to help you develop a science fair project idea from scratch Expert advice on choosing and researching a topic, finding a mentor, conducting an experiment, analyzing your findings, putting together a winning display, and much more Inspiring stories of real projects that show how students solved particular problems This ingenious guide also helps you prepare to deliver a top-notch oral presentation and answer questions from science fair judges. Plus, you'll find sample project journal worksheets, a handy list of scientific supply companies, and lots of space to record your thoughts and ideas as you work on your project. Today's exciting world of science fairs and contests offers many great opportunities. With The Complete Workbook for Science Fair Projects, you'll learn to think like a scientist and create a more effective, impressive science fair project--opening the door for an amazing science journey!

Suggests ideas for unique science fair projects under such headings as "chemists & cooks" and "eye & mind."

In this updated and expanded second edition of her popular guidebook, Searcher columnist Irene McDermott once again exhorts her fellow reference librarians to don their pith helmets and follow her fearlessly into the Web jungle. She presents new and improved troubleshooting tips and advice, Web resources for answering reference questions, and strategies for managing information and keeping current. In addition to helping librarians make the most of Web tools and resources, the book offers
