The rise and fall of the British Empire profoundly shaped the history of modern Scotland and the identity of its people. From the Act of Union in 1707 to the dramatic fall of the British Empire following the Second World War, Scotland's involvement in commerce, missionary activity, cultural dissemination, emigration, and political action could not be dissociated from British overseas endeavours. In fact, Scottish national pride and identity were closely associated with the benefits bestowed on this small nation through its access to the British Empire. By examining the opinions of Scots towards the empire from numerous professional and personal backgrounds, Scotland emerges as a nation inextricably linked to the British Empire. Whether Scots categorized themselves as proponents, opponents, or victims of empire, one conclusion is clear: they maintained an abiding interest in the empire even as it rapidly disintegrated during the twenty-year period following the Second World War. In turn, the end of the British Empire coincided with the rise of Scottish nationalism and calls for Scotland to extricate itself from the Union. Decolonization had a major impact on Scottish political consciousness in the years that followed 1965, and the implications for the sustainability of the British state are still unfolding today.

Globally, private universities enrol one in three of all higher education students. In Japan, which has the second largest higher education system in the world in terms of overall expenditure, almost 80% of all university students attend private institutions. According to some estimates up to 40% of these institutions are family businesses in the sense that members of a single family have substantive ownership or control over their operation. This book offers a detailed historical, sociological, and ethnographic analysis of this important, but largely under-studied, category of private universities as family business. It examines how such universities in Japan have negotiated a period of major demographic decline since the 1990s: their experiments in restructuring and reform, the diverse experiences of those who worked and studied within them and, above all, their unexpected resilience. It argues that this resilience derives from a number of 'inbuilt' strengths of family business which are often overlooked in conventional descriptions of higher education systems and in predictions regarding the capacity of universities to cope with dramatic changes in their operating environment. This book offers a new perspective on recent changes in the Japanese higher education sector and contributes to an emerging literature on private higher education and family business across the world.
