Based on over 45 years of research, BioGeometry Signatures are linear diagrams that help balance the subtle energy of body organs. The organ subtle energy patterns are accessed through BioGeometry Signatures placed externally in the body's energy fields to create a connection through Resonance of Shape. "This is a book that will change the way you think about your body and your health. It shows that we are not separate from the shapes, angles and proportions that surround us all the time, and that these shapes create energetic patterns that can introduce equilibrium and harmony into our own biological makeup. This is a modern science of energy balancing that provides the key to the hidden ancient knowledge of great civilizations. With BioGeometry, Dr. Ibrahim Karim has demonstrated how powerful simple shapes can be in altering the functioning of our physical, mental, and spiritual worlds. This has been frequently demonstrated in architectural and design projects, environmental balancing solutions including the mitigation of the effects of electro-pollution and geopathic stress, in health and wellness projects, and in the efforts of individuals in their personal spiritual development. In this book on BioGeometry Signatures, once again you see how powerful certain carefully created shapes can be in altering the physical functioning of organ systems, in supporting healing, and in changing physical and mental states. Work with them, let them touch you, and feel how they can assist you in your own search for harmony." Michael J. Maley, Ph.D. Instructor in BioGeometry

This book gathers the proceedings of the Sixth International Conference on Computational Science and Technology 2019 (ICCST2019), held in Kota Kinabalu, Malaysia, on 29–30 August 2019. The respective contributions offer practitioners and researchers a range of new computational techniques and solutions, identify emerging issues, and outline future research directions, while also showing them how to apply the latest large-scale, high-performance computational methods.

The Media of Diaspora examines how diasporic communities have used new communications media to maintain and develop community ties on a local and transnational level. This collection of essays from a wide range of different diasporic contexts is a unique contribution to the field.

Many take advantage of software and hardware accessibility in the English language. However, for non native speakers, this inevitably becomes a problem; specifically for the complex Bangla language which is not easily integrated into the world of technology. Technical Challenges and Design Issues in Bangla Language Processing addresses the difficulties as well as the overwhelming benefits associated with creating programs and devices that are accessible to the speakers of the Bangla language. Professionals, students, and researchers interested in expanding the fields of computing, information and knowledge management, and communication technologies in the non-English realm will benefit from this comprehensive collection of research.

This first-ever published collection of writings by Dr. Ibrahim Karim reflects the holistic essence of his worldview. Dr Karim is the founder of the Science of BioGeometry in the early 1970s. BioGeometry is the science that uses shapes, colors, motion and sound to induce harmony into the subtle energy qualities of the environment. At the core of this harmony is a subtle energy quality found in the transcendental centers of the forming process of nature and is the main quality in sacred power spots of humanity that give a spiritual dimension to the timeless monuments erected since the dawn of humanity. With his experience as an architect and a scientist Dr. Karim has synergized aspects of Pythagorean Harmonics, Subtle energy sciences, Radiesthesia, Geobiology, Building Biology, Sacred Architecture & modern wave theories to produce a new Physics of Quality from which the science of BioGeometry emerged. \*BioGeometry bridges science and spirituality to produce a natural harmony into the environment. \*BioGeometry provides a viable solution in transforming the quality of the effect that electromagnetic radiation has on living systems. Successful projects in Switzerland in collaboration & acknowledgment of Swiss authorities prove its efficiency to take our modern science into the future. \*BioGeometry provides new solutions to Earth Radiation, which is a serious health hazard if not acknowledged in the location and design of our buildings. \* A new energy-quality-based analysis of the Great Pyramid in Giza, reveals new knowledge on the foremost of the wonders of the world and on the essence of the great Ancient Egyptian civilization.

Dual-Fuel Diesel Engines offers a detailed discussion of different types of dual-fuel diesel

engines, the gaseous fuels they can use, and their operational practices. Reflecting cutting-edge advancements in this rapidly expanding field, this timely book: Explains the benefits and challenges associated with internal combustion, compression ignition, gas-fueled, and premixed dual-fuel engines Explores methane and natural gas as engine fuels, as well as liquefied petroleum gases, hydrogen, and other alternative fuels Examines safety considerations, combustion of fuel gases, and the conversion of diesel engines to dual-fuel operation Addresses dual-fuel engine combustion, performance, knock, exhaust emissions, operational features, and management Describes dual-fuel engine operation on alternative fuels and the predictive modeling of dual-fuel engine performance Dual-Fuel Diesel Engines covers a variety of engine sizes and areas of application, with an emphasis on the transportation sector. The book provides a state-of-the-art reference for engineering students, practicing engineers, and scientists alike.
