Seventeen years in NEPA project management and technical review, socioeconomic impact analysis, transportation impact analysis, air traffic impact analysis. EIS RESPONSIBILITY: Management reviewer ...

Evaluates the potential environmental impacts of a proposed mixed oxide fuel (MOX) fabrication facility that would convert depleted uranium and weapons-grade plutonium into MOX fuel.

This book proposes capacity options as a flexible alternative air cargo contract type, and illustrates how capacity can be priced through option contracts. The analysis is accomplished by means of an analytical multivariate optimization model under price and demand uncertainty. A case study using data from a leading German carrier illustrates the financial potential. Finally, the author shows how capacity-option contracts integrate into the context of air cargo revenue management.
