such key thinkers as Piaget, Erikson, and Kohlberg, Fowler draws on a wide range of scholarship, literature, and firsthand research to present expertly and engagingly the six stages that emerge in working out the meaning of our lives--from the intuitive, imitative faith of childhood through conventional and then more independent faith to the universalizing, self-transcending faith of full maturity. In this updated reissue of his 1984 classic, James Fowler applies his groundbreaking research on the development of faith to Christianity. In his revised first chapter Fowler locates his approach to the study of human and faith development in relation to the contemporary conversation about identity and selfhood in postmodernity. Fowler invites readers to explore what it means to find and claim vocation: a purpose for one's life that is part of the purposes of God. Reclaiming covenant and vocation as ideals for responsible, mature, Christian selfhood, Fowler shows how a dynamic understanding of what vocation involves can both inform and transform lives.

This book, now in its second edition, brings together the best available understandings of human development from a multidisciplinary perspective. Uniquely inclusive of the moral and faith dimensions of context and life-cycle development, *Human Development and Faith* examines the interplay of mind, body, family, community, and soul at every stage of development. It addresses two central questions: What are the "good-enough" conditions of parenting, family, and community in each phase of life, from birth to death, that support growth and development? What gives life adequate meaning as development proceeds? If human development describes the normative and hoped-for passages of life, then faith provides the necessary component of meaning.

Throughout the various perspectives offered in this volume is the premise that faith is that quality of living that makes it possible to fully live. The *Journal of Pastoral Theology* called the first edition of *Human Development and Faith* "an excellent text for pastoral theology courses, because it fulfills its ambitious goal of bringing a holistic faith perspective to the usual topics of development." This second edition includes a

James Fowler's work as the originator of faith development research -- his use of the theories of Jean Piaget and Erik Erikson for theology -- has been widely acclaimed for its profound impact on the field of religious education, and for its promise for other fields.

Jim Fowler explains that Christianity is not a book-religion, not a belief-system, not morality, not role-playing, not social problem-solving, not an ideological option, and not an ...ism, before concluding with the positive emphasis that Christianity IS Christ.

This Handbook draws together leading social scientists in the world from multiple disciplines to articulate what is known and needs to be known about spiritual development in childhood and adolescence.

Stages of Faith is a powerful 13-week study for personal and small group use, which should be in every small group leader's toolbox.
