Standard Surgical Attire

Surgical attire as a component of the environmental performance of a hospital. The three studies in this dissertation offer different types of analyses to provide a holistic perspective on the surgical attire market from the perspective of customer (textile user) preferences, policy and regulatory constraints, and resource use

Download File PDF

Standard Surgical Attire

And Surgical Scrub
efficiency. The first study conducted three rounds of warm-up jacket trials and questionnaires that included questions about satisfaction with 11 characteristics of warm-up jackets, specific problems with the jacket characteristics rated as unsatisfactory, demographic items, and overall ranking of the jackets. The main

Download File PDF Standard Surgical Attire

And Surgical Scrub
objective is to determine the characteristics of each jacket that influence staff's preferences among the jackets. An initial sample of 46 participants completed at least one round of jacket trial and survey, but only 13 people completed all three surveys for various reasons. Rank ANOVA models indicated that 8 of the 11
