MyStatLab from Pearson is the world’s leading online resource for teaching and learning statistics, integrating interactive homework, assessment, and media in a flexible, easy-to-use format. MyStatLab is a course management system that delivers improving results in helping individual students succeed.

Applied Business Statistics for Business and Management using Microsoft Excel is the first book to illustrate the capabilities of Microsoft Excel to teach applied statistics effectively. It is a step-by-step exercise-driven guide for students and practitioners who need to master Excel to solve practical statistical problems in industry. If understanding statistics isn’t your strongest suit, you are not especially mathematically-inclined, or if you are wary of computers, this is the right book for you. Excel, a widely available computer program for students and managers, is also an effective teaching and learning tool for quantitative analyses in statistics courses. Its powerful computational ability and graphical functions make learning statistics much easier than in years past. However, Applied Business Statistics for Business and Management capitalizes on these improvements by teaching students and practitioners how to apply Excel to statistical techniques necessary in their courses and workplace. Each chapter explains statistical formulas and directs the reader to use Excel commands to solve specific, easy-to-understand business problems. Practice problems are provided at the end of each chapter with their solutions.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Analyze the data, see the business relevance. Reducing the emphasis on doing computations, this practical text thoroughly integrates Microsoft® Excel as a tool for analysis and presents statistical concepts in the context of the functional areas of business. The sixth edition focuses on making statistics even more relevant to the business world and builds on the book’s hallmark feature of helping readers with the analysis of statistics.

"Statistics for Managers Using Microsoft Excel features a more concise style for understanding statistical concepts"--

Designed for either one-semester or two-semester introductory business statistics course at the undergraduate or graduate level. This is the first business statistics text designed specifically to use Microsoft Excel as a means of teaching statistical business applications. Provides streamlined coverage of a range of statistical topics with a managerial focus. The UPDATED VERSION will contain: 1.) a new chapter on Decision Analysis (Ch. 14); 2.) Excel 97 (8.0) supplement this supplement consists of four parts; 3.) A disk which contains fully developed Excel worksheets for all Excel examples/problems in the book. These are all ready-to-use and completely documented. PLUS, we have enhanced the text with 18 of the most commonly used worksheets which have been automated. This allows the user to solve examples/problems of any size all with the click of a button.

NOTE: Before purchasing, check with your instructor to ensure you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, and registrations are not transferable. To register for and use Pearson's MyLab & Mastering products, you may also need a Course ID, which your instructor will provide. Used books, rentals, and purchases made outside of Pearson If purchasing or renting from companies other than Pearson, the access codes for Pearson's MyLab & Mastering products may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase. "For undergraduate business statistics courses. " "This package includes MyStatLab .
