Seat the student with ADHD away from windows and away from the door. Put the student with ADHD right in front of your desk unless that would be a distraction for the student. Seats in rows, with focus on the teacher, usually work better than having students seated around tables or facing one another in other arrangements.

Some tips for dealing with students are: Real examples must be provided. For example, use physical items to teach addition and subtraction. Break up problems into various stages and make sure the child understands a step before going on to the next one.

Many teachers in regular classrooms feel unprepared to teach students with learning disabilities. Fortunately, brain research has confirmed that strategies benefiting learners with special challenges are suited for engaging and stimulating all learners. In this book, neurologist and classroom teacher Judy Willis explains that we can best help students by putting in place strategies, accommodations,

and interventions that provide developmentally and academically appropriate challenges to suit the needs, gifts, and goals of each student. Brain-Friendly Strategies for the Inclusion Classroom will help teachers

- \* Understand how the brain learns and the technologies that reveal this process.
- \* Implement strategies that are compatible with students' individual learning styles and honor their multiple intelligences.
- \* Improve the focus of students with attention disorders and help them gain the confidence and skills they need to develop goal-oriented behaviors.
- \* Create an enriching learning environment by incorporating student-centered activities, discovery and hands-on learning experiences, cross-curricular learning, and multisensory lessons.
- \* Implement strategic review, study, and test preparation strategies that will allow students to retain information and connect it with future learning.
- \* Build safe, supportive classroom communities and raise class awareness and empathy for students with learning disabilities.

It's time for teachers to lower the barriers, not the bar. Using strategies that align with research on how people's brains function, teachers can engage all students as individuals and help them reach their maximum potential with joy and confidence.

Learning for Keeps answers the questions teachers frequently ask about how to provide the explicit strategy instruction that supports the higher-level skills students need to meet the rigorous demands of the Common Core Standards. Teachers recognize that students often do not come to our classrooms with the skills necessary for the activities and projects that require solving problems,

reading deeply, responding to higher levels of text complexity, communicating well-developed ideas, and performing the many cognitive behaviors necessary for long-term intellectual development. Here's a highly practical book that gives teachers the specific knowledge and larger vision needed to demystify essential strategies with explicit instruction. The reader will come away with a tutorial in breaking down complex strategies into incremental parts; models of scripted explicit strategy lessons; examples of coaching transactions that mediate students' application of strategies; and scaffolded activities that integrate content and process. Learning for Keeps is an indispensable tool for enabling all students to independently select and apply the behaviors needed for becoming highly literate and thoughtful citizens prepared for college and 21st century careers.

**METHODS AND STRATEGIES FOR TEACHING STUDENTS WITH MILD DISABILITIES: A Case-Based Approach, International Edition** uses case studies and application activities for a more focused and integrated approach to teaching K-12 special education teaching methods. The case study approach is a distinctive feature of this program—with both text case studies and video case studies in each chapter. The text provides a special emphasis on teaching children with mild to moderate disabilities such as ADHD, learning disabilities, mild mental retardation, and emotional/behavioral disorders.

her first exam but 83% and 93% on the next two. What is preventing your students from performing according to expectations? Sandra McGuire offers a simple but profound answer: If you teach students how to learn and give them simple, straightforward strategies to use, they can significantly increase their learning and performance. For over a decade Sandra McGuire has been acclaimed for her presentations and workshops on metacognition and student learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success. This book encapsulates the model and ideas she has developed in the past fifteen years, ideas that are being adopted by an increasing number of faculty with considerable effect. The methods she proposes do not require restructuring courses or an inordinate amount of time to teach. They can often be accomplished in a single session, transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning. Sandra McGuire takes the reader sequentially through the ideas and strategies that students need to understand and implement. First, she demonstrates how introducing students to metacognition and Bloom's Taxonomy reveals to them the importance of understanding how they learn and provides the lens through which they can view learning activities and measure their intellectual growth. Next, she

presents a specific study system that can quickly empower students to maximize their learning. Then, she addresses the importance of dealing with emotion, attitudes, and motivation by suggesting ways to change students' mindsets about ability and by providing a range of strategies to boost motivation and learning; finally, she offers guidance to faculty on partnering with campus learning centers. She pays particular attention to academically unprepared students, noting that the strategies she offers for this particular population are equally beneficial for all students. While stressing that there are many ways to teach effectively, and that readers can be flexible in picking and choosing among the strategies she presents, Sandra McGuire offers the reader a step-by-step process for delivering the key messages of the book to students in as little as 50 minutes. Free online supplements provide three slide sets and a sample video lecture. This book is written primarily for faculty but will be equally useful for TAs, tutors, and learning center professionals. For readers with no background in education or cognitive psychology, the book avoids jargon and esoteric theory.

While this book addresses the needs of students who read print, braille, or both, much of the book is also consistent with strategies for teaching reading to students who have, or are at risk for, developing reading disabilities. Teachers of students with visual impairments, as well as family members and other professionals who work with children who are blind or visually impaired, will find within this book a repertoire of strategies and activities for creating a balanced, comprehensive plan of reading instruction for each student and for teaching the essential reading skills necessary for students' success.

Many students arrive at school with unique mixtures of family histories, traumatic experiences, and special needs that test our skills and try our patience. In *Hanging In: Strategies for Teaching the Students Who Challenge Us Most*, veteran educator Jeffrey Benson shows educators the value of tenacity and building connections in teaching the students who most need our help. This essential guide includes \*

- \* Detailed portraits based on real-life students whose serious challenges inhibited their classroom experience--and how they eventually achieved success;
- \* Strategies for how to analyze students' challenges and develop individualized plans to help them discover a sense of comfort with learning--with in-depth examples of plans in action;
- \* Recommendations for teachers and support team on how to gain skills and support and not lose hope through the ups and downs of the work; and
- \* Specific advice for administrators on constructing systems and procedures that give all our students the best chance for success. Just as teaching the students
