This book deals with street

File Type PDF Street Children

children who live in the developing world, and homeless youth who are from the developed world. They are referred to as children in street situations (CSS) to show that the problem is both in the children and in

File Type PDF Street Children

the situation they face. The book examines several aspects of the children and their street situations, including the families of origin and the homes they leave, the children's social life, and mental health.

File Type PDF Street Children

Other aspects are the problems of published demographics, the construction of public opinion about these children and the, often violent, reactions from authorities. The book then discusses

File Type PDF Street Children

current research on children in street situations, as well as programs and policies. The book ends with recommendations about programs, policies and research.

up due to the influence of the victim's mother and her far-reaching political connections. The children's lives become more closely intertwined as each child engages in a desperate bid for survival against forces

Street children can be
considered as one of the by-
products of the urbanisation
process in developing

File Type PDF Street Children

countries. These children are to struggle very hard for their survival on the streets in very highly competitive environments, otherwise they fall prey to the public or even to their own parents also. Their

File Type PDF Street Children

childhood is seized, they are abused and their labour is greatly exploited for the benefit of others. In this book an attempt has been made to present a holistic profile of the street children of a growing urban

File Type PDF Street Children

city of Eastern India. Especially the prime thrust of the book concentrates on the aspects, like motive behind coming over to urban bases, educational and occupational profile of their parents and their

File Type PDF Street Children

family size, category and shelter of the street children, educational and occupational pattern of the street children, expenditure and savings, occupational hazards, use of earnings of these children by their

File Type PDF Street Children

parents, nourishment and addictive behaviour, health and hygiene, educational choice and future perspectives, attitudes of the public toward the street children etc. Apart from all these, the book also speaks

File Type PDF Street Children

about the pre and post-independence legislations on these children, UN s convention on rights of the child and National Plan of Action, State Plan of Action, welfare agencies working for the betterment
