WHEN WILL COVID-19 END? After months and months of suffering from the global pandemic, we are desperate to know when life will return to normal -- how much longer will we have to live with it? While western science provides answers and solutions to

Online Library Sujok Therapy

these questions, eastern astrology offers a much more holistic view to the nature of the virus. Leading astrologist and ayurvedic practitioner Atul Kulkarni offers his wisdom and insight for the first time here, providing clarity and understanding to our questions about the corona virus and previous pandemics the world has suffered through. Kulkarni provides valuable historical insight into the cyclical aspect of epidemics, starting with the bubonic plague that struck Europe in 1720, the cholera epidemic in 1817, the Spanish flu in 1918, and now the coronavirus in 2020. After close examination, Kulkarni explains how this cycle of disease can be attributed to the specific planetary conditions during each of the last four centuries. The rise of each pandemic can be attributed to and distinguished by the

specific Rashis -- zodiac signs -- under which they proliferated. Kulkarni details how the nature of the disease and the different organs it affects changes depending on the zodiac sign to which it belongs. And further, in the same way that we can understand the pandemics of the past and present through an astrological perspective, likewise, it is possible to predict when the next epidemic will come in the following century and what its nature will be. Corona Virus from an Astrological Point of View is a must read for those who seek to understand the nature of this current pandemic. Though clear and accessible language, Atul Kulkarni provides a straightforward introduction to astrology and its medical applications, allowing us to better understand how COVID-19 came to be, what we can

do to combat it, and how it will end.

Integration of complementary and alternative medicine therapies (CAM) with conventional medicine is occurring in hospitals and physicians offices, health maintenance organizations (HMOs) are covering CAM therapies, insurance coverage for CAM is increasing, and integrative medicine centers and clinics are being established, many with close ties to medical schools and teaching hospitals. In determining what care to provide, the goal should be comprehensive care that uses the best scientific evidence available regarding benefits and harm, encourages a focus on healing, recognizes the importance of compassion and caring, emphasizes the centrality of relationship-based care, encourages

patients to share in decision making about therapeutic options, and promotes choices in care that can include complementary therapies where appropriate. Numerous approaches to delivering integrative medicine have evolved.

Complementary and Alternative Medicine in the United States identifies an urgent need for health systems research that focuses on identifying the elements of these models, the outcomes of care delivered in these models, and whether these models are cost-effective when compared to conventional practice settings. It outlines areas of research in conventional and CAM therapies, ways of integrating these therapies, development of curriculum that provides further education to health professionals, and an amendment of
