Explaining how archaeologists reconstructed Alexandria's ancient harbour topography, this volume provides reports of excavations in neighbouring Aboukir Bay, where remains have been discovered off the coast belonging to cities that predate the founding of Alexandria.

From about 2000 BCE onward, Egypt served as an important nexus for cultural exchange in the eastern Mediterranean, importing and exporting not just wares but also new artistic techniques and styles. Egyptian, Greek, and Roman craftsmen imitated one another's work, creating cultural and artistic hybrids that transcended a single tradition. Yet in spite of the remarkable artistic production that resulted from these interchanges, the complex vicissitudes of exchange between Egypt and the Classical world over the course of nearly 2500 years have not been comprehensively explored in a major exhibition or publication in the United States. It is precisely this aspect of Egypt's history, however, that *Beyond the Nile* uncovers. Renowned scholars have come together to provide compelling analyses of the constantly evolving dynamics of cultural exchange, first between Egyptians and Greeks—during the Bronze Age, then the Archaic and Classical periods of Greece, and finally Ptolemaic Egypt—and later, when Egypt passed to Roman rule with the defeat of Cleopatra. *Beyond the Nile*, a milestone publication issued on the occasion of a major international exhibition, will become an indispensable contribution to the field. With gorgeous photographs of more than two hundred rare objects, including frescoes, statues, obelisks, jewelry, papyri, pottery, and coins, this volume offers an essential and inter-disciplinary approach to the rich world of artistic cross-pollination during antiquity.

reading Africa may have given rise to the first human beings, and Egypt probably gave rise to the first great civilizations, which continue to fascinate modern societies across the globe nearly 5,000 years later. From the Library and Lighthouse of Alexandria to the Great Pyramid at Giza, the Ancient Egyptians produced several wonders of the world, revolutionized architecture and construction, created some of the world's first systems of mathematics and medicine, and established language and art that spread across the known world. With world-famous leaders like King Tut and Cleopatra, it's no wonder that today's world has so many Egyptologists. What makes the accomplishments of the Ancient Egyptians all the more remarkable is that Egypt was historically a place of great political turbulence. Its position made it both valuable and vulnerable to tribes across the Mediterranean and the Middle East, and Ancient Egypt had no shortage of its own internecine warfare. Its most famous conquerors would come from Europe, with Alexander the Great laying the groundwork for the Hellenic Ptolemy line and the Romans extinguishing that line after defeating Cleopatra and driving her to suicide. One of the primary reasons why modern scholars know so much about Egyptian history is due to many monuments found up and down the Nile. Although some of the tombs built on the west bank of the Nile River have suffered a fair amount of wind damage and all of the great monuments have endured the ravages of time, they are amazingly well-preserved, thanks both to Egypt's arid climate and good workmanship. The Egyptian monument builders were truly a class above their contemporaries in terms of their trade, which was helped by the fact that they worked with the more permanent materials of sandstone and limestone, unlike Mesopotamian builders who were forced to primarily work with mud and brick. Of course, even the finest made Egyptian granite statues and limestone temples could do little to stop population explosions and changing weather patterns, which combined to bury most pharaonic era monuments in the Egyptian Delta. Today, the Delta is the most densely populated portion of the already densely

populated country and is located on a high water table that is subject to routine flooding, just as it was in ancient times. Throughout the millennia since the pharaohs ruled Egypt, peasants have routinely used remnants of ancient monuments for new housing structures, implements, and even fertilizer, and the situation is even more pronounced closer to the Mediterranean coast. Cities that once were major ports where the various branches of the Nile River flowed into the Mediterranean are now miles off the coastline, under hundreds of feet of water. The existence of these cities was known thanks to Egyptian and Greek historical sources, but their locations could never be positively identified until the advent of modern marine technology. In 1996, adventurer and scholar Franck Goddio identified what he believed was a major site just off the Mediterranean coastline in the Abu Qir Bay, east of Alexandria. It turned out Goddio had discovered the ancient city of Heracleion, which was part of a larger metropolitan area that included the cities of Canopus and Naucratis. Although there is still much work to be done, the discovery has already yielded vital information about Heracleion's importance as a center of trade and religion from the 7th century BCE until the 8th century CE. *The Lost City of Heracleion: The History of the Ancient Egyptian City Now Underwater in the Mediterranean* examines the history of the city, and what life was like there. Along with pictures depicting important people, places, and events, you will learn about Heracleion like never before.

The essential resource from Martha Stewart, with expert advice and lessons on gardening and making the most of your spectacular blooms Martha Stewart's lifelong love of flowers began at a young age, as she dug in and planted alongside her father in their family garden, growing healthy, beautiful blooms,

every year. The indispensable lessons she learned then--and those she has since picked up from master gardeners--form the best practices she applies to her voluminous flower gardens today. For the first time, she compiles the wisdom of a lifetime spent gardening into a practical yet inspired book. Learn how and when to plant, nurture, and at the perfect time, cut from your garden. With lush blooms in hand, discover how to build stunning arrangements. Accompanied by beautiful photographs of displays in Martha's home, bursting with ideas, and covering every step from seed to vase, Martha's Flowers is a must-have handbook for flower gardeners and enthusiasts of all skill levels.

The discovery of the Lena Shoal wreck northeast of Palawan in the Philippines in February 1997 has shed light on historical trading patterns in south-east Asia. This work is a history and analysis of the 15th century wreck and its cargo giving the background of Chinese trade at the time.

This book is a literary, social, and political portrait of Alexandria at a high point of its history. Drawing on diaries, letters, and interviews, Michael Haag recovers the lost life of the city, its cosmopolitan inhabitants, and its literary characters. Located on the coast of Africa yet rich in historical associations with Western civilization, Alexandria was home to an exotic variety of people whose cosmopolitan families had long been rooted in the commerce and the culture of the entire Mediterranean world. Alexandria famously excited the imaginations of writers, and Haag folds intimate accounts of E. M. Forster, Greek poet Constantine Cavafy, and Lawrence Durrell into the story of its inhabitants. He recounts the city's experience of the two world wars and explores the communities that gave Alexandria its unique flavor: the Greek, the Italian, and the Jewish. The book deftly harnesses the sexual and emotional charge of cosmopolitan life in this extraordinary city, and highlights the social and political
