Anglesey became a refuge for survivors from across the world, but living in the shadow of a decrepit nuclear power station was always a precarious existence. There is only one destination for their final exodus from Britain, but Belfast won't become their new home. There are fewer undead on the island of Ireland, but their numbers still count in the millions. With farming impossible, with the weather worsening, with ammunition exhausted, desperation turns to despair. All seems bleak, but the survivors don't know how truly desperate their situation is. During the chaos that ensued after the calamitous election, they misjudged the evidence. Their true enemy is still among them, and that enemy is about to act. Set nine months after the outbreak, in Britain and the island of Ireland, when humanity is at a crossroads. Either all will survive, or our species will die.

Zombies. The outbreak began in New York. Soon it had spread to the rest of the world. People were attacked, infected, and they died. Then they came back. No one is safe from the undead. As anarchy and civil war took grip across the globe, Britain was quarantined. The British press was nationalised. Martial law, curfews and rationing were implemented. It wasn't enough. An evacuation was planned. The inland towns and cities of the United Kingdom were to be evacuated to defensive enclaves being built around the coast, the Scottish Highlands, and in the Irish Republic. Bill Wright, a Westminster insider and an advisor to a future Prime Minister, broke his leg on the day of the outbreak. Unable to join the evacuation, he watched from his window as the streets filled with refugees. He watched as the streets emptied once more. He watched as they filled up again, this time with the undead. Then the power went out. He is trapped. He is alone. He is running out of food and water. He knows that to reach the safety of the enclaves he will have to venture out into the wasteland that once was England. On that journey he will ultimately discover the horrific truth about the outbreak, a decades old conspiracy, and his unwitting part in it. This is the first volume of his journal. (73,000 words)

Whoever wins the election, humanity will lose. Nine months after the outbreak, ten thousand survivors from across the globe have found a refuge on the Welsh island of Anglesey. Hordes of the undead ravage the wastelands of Britain and Ireland. Satellite images show that the rest of the world is no better. Food, fuel, and ammunition are running low and there are no more old-world supplies with which to replace them. Intended as an alternative to a slide into despotism, an election is called. It is

hoped the contest will bring forth solutions to the myriad crises facing this last bastion of humanity. After the favoured candidate is hospitalised, suspicion falls on the new frontrunner, a publican who purchased his support with an impossible promise of a return to the pre-apocalyptic world. With no viable candidate, and no way of calling off the election, those who still have access to a ship plan their departure; others plan to rig the contest; a few give up on all plans for a future beyond tomorrow. Anglesey is on the verge of collapse, and humanity is on the brink of extinction. Set in Belfast, the Isle of Man, and Wales during the run-up to the election on Anglesey, this is the sixth volume of Bill Wright ' s journals.

Sixty years ago the world was wrecked during a terrible war. The soil was poisoned. The air became toxic. Billions died. Those who survived took refuge in great towered cities, and began constructing giant colony ships that would enable them to escape the ruined Earth. The work wasn ' t completed in their lifetime. The seas rose to swamp the diseased land, and lap against the city walls. Their descendants laboured on, and now the first of the spaceships is nearing completion. But these cities aren ' t dictatorships. An election is scheduled to choose a leader for this last exodus of humanity. With twenty-four hours until voting is due to begin, two workers are murdered. It is the first serious crime in generations, and it is down to the young Constable Ely to solve it. The election must take place. The ships must be launched. Above all, production must come first. Pulitzer Prize winner Sheri Fink ' s landmark investigation of patient deaths at a New Orleans hospital ravaged by Hurricane Katrina—and her suspenseful portrayal of the quest for truth and justice. In the tradition of the best investigative journalism, physician and reporter Sheri Fink reconstructs 5 days at Memorial Medical Center and draws the reader into the lives of those who struggled mightily to survive and maintain life amid chaos. After Katrina struck and the floodwaters rose, the power failed, and the heat climbed, exhausted caregivers chose to designate certain patients last for rescue. Months later, several of those caregivers faced criminal allegations that they deliberately injected numerous patients with drugs to hasten their deaths. *Five Days at Memorial*, the culmination of six years of reporting, unspools the mystery of what happened in those days, bringing the

reader into a hospital fighting for its life and into a conversation about the most terrifying form of health care rationing. In a voice at once involving and fair, masterful and intimate, Fink exposes the hidden dilemmas of end-of-life care and reveals just how ill-prepared we are for the impact of large-scale disasters—and how we can do better. A remarkable book, engrossing from start to finish, *Five Days at Memorial* radically transforms your understanding of human nature in crisis. One of *The New York Times*' Best Ten Books of the Year

It took three weeks to destroy civilisation. It won't be rebuilt in a day. A year after the outbreak, a sharp winter is followed by a sudden thaw. Spring has come early to Nova Scotia, bringing new hope. For the thirteen thousand survivors who've found sanctuary in northern Canada, and for the first time since the apocalypse, extinction isn't imminent. But it looms large in the near future, a legacy of the nuclear war that destroyed civilisation. As the weather improves, some survivors quit the small community. Even more plan their departure. The old-world supplies of food, oil, and ammunition have been consumed. More will have to be grown, drilled, and made. Medicine, paper, clothes: in a few years there will be none left to salvage. If it can't be manufactured, it will have to be forgone. What knowledge can't be preserved will be lost. Humanity's future appears bleak unless more people can be found. Hoping there is some truth in the rumours of a redoubt in Vancouver, an expedition to the Pacific is launched. The journey will be perilous as North America was ground zero for the outbreak, and for the nuclear war. Set in Canada and beyond, as survivors from the Atlantic and Pacific meet. Please note, this book features places and events, and heroes and villains from the saga of the Pacific survivors told in the series *Life Goes On*.
