villages, yet by the end of this century almost all of us will live in cities. But that journey has not been a smooth one and urban civilizations have risen and fallen many times in history. The ruins of many of them still enchant us. This book tells the story of the rise and fall of ancient cities from the end of the Bronze Age to the beginning of the Middle Ages. It is a tale of war and politics, pestilence and famine, triumph and tragedy, by turns both fabulous and squalid. Its focus is on the ancient Mediterranean: Greeks and Romans at the centre, but Phoenicians and

Etruscans, Persians, Gauls, and Egyptians all play a part. The story begins with the Greek discovery of much more ancient urban civilizations in Egypt and the Near East, and charts the gradual spread of urbanism to the Atlantic and then the North Sea in the centuries that followed. The ancient Mediterranean, where our story begins, was a harsh environment for urbanism. So how were cities first created, and then sustained for so long, in these apparently unpromising surroundings? How did they feed themselves, where did they find water and building materials, and what did they

And with their waste and their dead? Why, in the end, did their rulers give up on them? And what it was like to inhabit urban worlds so unlike our own - cities plunged into darkness every night, cities dominated by the temples of the gods, cities of farmers, cities of slaves, cities of soldiers. Ultimately, the chief characters in the story are the cities themselves.

Ancient cities in human history—and figure out why people abandoned them. In *Four Lost Cities*, acclaimed science journalist Annalee Newitz takes readers on an entertaining and mind-bending adventure into the deep history of urban life. Investigating across the centuries and around the world, Newitz explores the rise and fall of four ancient cities, each the center of a sophisticated civilization: the Neolithic site of Çatalhöyük in Central Turkey, the Roman vacation town of Pompeii on Italy's southern coast, the medieval megacity of Angkor in Cambodia, and the

And Rome indigenous metropolis Cahokia, which stood beside the Mississippi River where East St. Louis is today. Newitz travels to all four sites and investigates the cutting-edge research in archaeology, revealing the mix of environmental changes and political turmoil that doomed these ancient settlements. Tracing the early development of urban planning, Newitz also introduces us to the often anonymous workers—slaves, women, immigrants, and manual laborers—who built these cities and created monuments that lasted millennia. Four Lost Cities is a journey into the

What made ancient cities successful? What are the similarities between modern cities and ancient ones? The Social Construction of Ancient Cities offers a fresh perspective on ancient cities and the social networks and relations that built and sustained them, marking a dramatic change in the way archaeologists approach them. Examining ancient cities from a "bottom up" perspective, the authors in this volume explore the ways in which cities were actually created by ordinary inhabitants. They track the development of urban space from the point of view of individuals

And households, providing new insights into cities' roles as social centers as well as focal points of political and economic activities. Analyzing various urban communities from residences and neighborhoods to marketplaces and ceremonial plazas, the authors examine urban centers in Africa, Mesoamerica, South America, Mesopotamia, the Indian subcontinent, and China. Collectively they demonstrate how complex networks of social relations and structures gave rise to the formation of ancient cities, contributed to their cohesion, and sustained

And Remains their growth, much as they do in modern urban centers. The authors' analyses draw from ancient texts as well as archaeological surveys and excavations of urban architecture and other material remains, including portable objects for daily use and comestibles. They show clearly how early urban dwellers consciously developed dense interdependent social networks to satisfy their needs for food, housing, and employment, forged their own urban identities, and generally managed to thrive in the crowded, bustling, and competitive environment that characterized ancient
