Businesses need a new type of problem solving. Why? Because they are getting people wrong. Traditional problem-solving methods taught in business schools serve us well for some of the everyday challenges of business, but they tend to be ineffective with problems involving a high degree of uncertainty. Why? Because, more often than not, these tools are based on a flawed model of human behavior. And that flawed model is the invisible scaffolding that supports our surveys, our focus groups, our R&D, and much of our long-term strategic planning. In *The Moment of Clarity*, Christian Madsbjerg and Mikkel Rasmussen examine the business world's assumptions about human behavior and show how these assumptions can lead businesses off track. But the authors chart a way forward. Using theories and tools from the human sciences—anthropology, sociology, philosophy, and psychology—*The Moment of Clarity* introduces a practical framework called sensemaking. Sensemaking's nonlinear problem-solving approach gives executives a better way to understand business challenges involving shifts in human behavior. This new methodology, a fundamentally different way to think about strategy, is already taking off in Fortune 100 companies around the world. Through compelling case studies and their direct experience with LEGO, Samsung, Adidas, Coloplast, and Intel, Madsbjerg and Rasmussen will show you how to solve problems as diverse as setting company direction, driving growth, improving sales models, understanding the real culture of your organization, and finding your way in new markets. Over and over again, executives say the same thing after engaging in a process of sensemaking: “ Now I see it . . . ” This experience—the moment of clarity—has the potential to drive the entire strategic future of your company. Isn't it time you and your firm started getting people right? Learn more about the innovation and strategy work of ReD Associates at: redassociates.com

A Financial Times "Business Book of the Month" Based on his work at some of the world's largest companies, including Ford, Adidas, and Chanel, Christian Madsbjerg's *Sensemaking* is a provocative stand against the tyranny of big data and scientism, and an urgent, overdue defense of human intelligence. Humans have become subservient to algorithms. Every day brings a new Moneyball fix--a math whiz who will crack open an industry with clean fact-based analysis rather than human intuition and experience. As a result, we have stopped thinking. Machines do it for us. Christian Madsbjerg argues that our fixation with data often masks stunning deficiencies, and the risks for humankind are enormous. Blind devotion to number crunching imperils our businesses, our educations, our governments, and our life savings. Too many companies have lost touch with the humanity of their customers, while marginalizing workers with liberal arts-based skills. Contrary to popular thinking, Madsbjerg shows how many of today's biggest success stories stem not from "quant" thinking but from deep, nuanced engagement with culture, language, and history. He calls his method sensemaking. In this landmark book, Madsbjerg lays out five principles for how business leaders, entrepreneurs, and individuals can use it to solve their thorniest problems. He profiles companies using sensemaking to connect with new customers, and takes readers inside the work process of sensemaking "connoisseurs" like investor George Soros, architect Bjarke Ingels, and others. Both practical and philosophical, *Sensemaking* is a powerful rejoinder to corporate groupthink and an indispensable resource for leaders and innovators who want to stand out from the pack.

"A Moment of Clarity: The Journey Continues," began as a writing workshop to exercise the therapeutic value of reflecting our internal thoughts in the form of writing in an effort to better aide us towards our recovery and stability. The workshop was designed specifically for men and women who desired to tell their stories through the written word and who had decided to share their experiences with others. By the end of the four-week workshop, each story was compiled into a collection of testimonies from individuals who have struggled through many obstacles and were determined to live victoriously. By translating our stories from our minds and writing it down on page, we recollected memories of our journey thus far and were able to express the passion of our present state of being. Through the process, the writing gave life to our vision and future goals. Over thirty stories and poems have been contributed to the book from individuals from all walks of life with no discrimination towards background, age, race, religion, sexuality, or type of addiction.

NEW YORK TIMES BESTSELLER From the celebrated author of Inward comes a new collection of poetry and short prose focused on understanding how past wounds impact our present relationships. In Clarity & Connection, Yung Pueblo describes how intense emotions accumulate in our subconscious and condition us to act and react in certain ways. In his characteristically spare, poetic style, he guides readers through the excavation and release of the past that is required for growth. To be read on its own or as a complement to Inward, Yung Pueblo 's second work is a powerful resource for those invested in the work of personal transformation, building self-awareness, and deepening their connection with others.
