Chapter 14 Section 1 The Nation's Sick Economy

Despite the range and abundance of autobiographical writing from the Anglophone Caribbean, this book is the first to explore this literature fully. It covers works from the colonial era up to present-day AIDS memoirs and assesses the links between more familiar works by George Lamming, C. L. R. James, Derek Walcott, V. S. Naipaul, and Jamaica Kincaid and less frequently cited works by the Hart sisters, Mary Prince, Mary Seacole, Claude McKay, Yseult Bridges, Jean Rhys, Anna Mahase, and Kamau Brathwaite. Sandra Pouchet Paquet charts the intersection of multiple, contradictory viewpoints of the colonial and postcolonial Caribbean, differing concepts of community and levels of social integration, and a persistent pattern of both resistance and accommodation within island states that were largely shaped by British colonial practice from the mid-seventeenth through the mid-twentieth century. The texts examined here reflect the entire range of autobiographical practice, including the slave narrative and testimonial, written and oral narratives, spiritual autobiographies, fiction, serial autobiography, verse, diaries and journals, elegy, and parody.

Chapter 14 Section 1 The Nation's Sick Economy

A book that both presents startling and enriching interpretations of three major films and proposes a radical, far-reaching account of subjectivity and human relationships.

Chapter 14 Section 1 The Nation's Sick Economy

To understand how China is shaping the twenty-first century, China Dreams eavesdrops on conversations between officials, scholars, bloggers, novelists, film-makers and artists. Rather than pitting Confucian China against the democratic west, Callahan weaves Chinese and American ideals together to describe a new "Chimerican dream".

Chapter 14 Section 1 The Nation's Sick Economy

Trees Up Close offers an intimate, revealing look at the beauty of leaves, flowers, cones, fruits, seeds, buds, bark, and twigs of the most common trees. With more than 200 dazzling photos, you will be amazed by the otherworldly beauty of the acorns from a sawtooth oak, enchanted by the immature fruits of a red maple, and dazzled by the delicate emerging flowers of the American elm.

Chapter 14 Section 1 The Nation's Sick Economy

Most global citizens are well aware of the explosive growth of the Chinese economy. Indeed, China has famously become the "workshop of the world." Yet, while China watchers have shed much light on the country's internal dynamics--China's politics, its vast social changes, and its economic development--few have focused on how this increasingly powerful nation has become more active and assertive throughout the world. In China Goes Global, eminent China scholar David Shambaugh delivers the book that many have been waiting for--a sweeping account of China's growing prominence on the international stage. Thirty years ago, China's role in global affairs beyond its immediate East Asian periphery was decidedly minor and it had little geostrategic power. Today however, China's expanding economic power has allowed it to extend its reach virtually everywhere--from mineral mines in Africa, to currency markets in the West, to oilfields in the Middle East, to agribusiness in Latin America, to the factories of East Asia. Shambaugh offers an enlightening look into the manifestations of China's global presence: its growing military power, its increasing cultural influence or "soft power," its diplomatic activity, and its new prominence in global governance institutions. But Shambaugh is no alarmist. In this balanced and well-researched volume, he argues that China's global presence is more broad than deep and that China still lacks the influence befitting a major world power--what he terms a "partial power." He draws on his decades of China-watching and his deep knowledge of the subject, and exploits a wide variety of previously untapped sources, to shed valuable light on China's current and future roles in world affairs.

Chapter 14 Section 1 The Nation's Sick Economy

Brings together leading scholars to analyse the central issues of power, order, and change in world politics.

Chapter 14 Section 1 The Nation's Sick Economy

China is rising. But how should the West - and the United States in particular - respond? This could be the key geopolitical question of the twenty-first century, according to strategic expert Hugh White, with huge implications for the future security and prosperity of the West as a whole. The China Choice confronts this fundamental question, considering the options for the Asian century ahead. As China's economy grows to become the world's largest, the US has three choices: it can compete, share power, or concede leadership in Asia. The choice is momentous - as significant for the future as any the US has ever faced. China is already more formidable than any country the US has faced before - and if America does not want to find itself facing China as an enemy, it must accept it as an equal partner. Weighing the huge difficulties of accepting China as an equal with the immense cost and risks of making it an enemy, in the end the choice is simple, even if it is not easy. The US simply must share power with China in Asia. The alternative is too terrible to contemplate.

Chapter 14 Section 1 The Nation's Sick Economy

Embrace and revel in the stories of the toughest cyclists of all time, told by The Velominati, originators of The Rules. Read and get ready to ride . . . In cycling, suffering brings glory: a rider's value can be judged by their results, but also by their panache and heroism. Prepared to be awed and inspired by Chris Froome riding on at the Tour de France with a broken wrist or Geraint Thomas finishing it with a broken pelvis. In The Hardmen the writers behind cycling superblog Velominati.com and The Rules will tell the stories and illuminate the myths of not just the greatest cyclists ever, but the toughest. From Eddy Merckx to Beryl Burton, and from Marianne Vos to Edwig Van Hooydonk, the book will lay bare the secrets of their extraordinary and inspirational endurance in the face of pain, danger and disaster. After all, suffering is one of the joys of being a cyclist. Embrace climbs, relish the descents, and get ready to harden up. . .

Chapter 14 Section 1 The Nation's Sick Economy

The rise of China could be the most important political development of the twenty-first century. What will China look like in the future? What should it look like? And what will China's rise mean for the rest of world? This book, written by China's most influential foreign policy thinker, sets out a vision for the coming decades from China's point of view. In the West, Yan Xuetong is often regarded as a hawkish policy advisor and enemy of liberal internationalists. But a very different picture emerges from this book, as Yan examines the lessons of ancient Chinese political thought for the future of China and the development of a "Beijing consensus" in international relations. Yan, it becomes clear, is neither a communist who believes that economic might is the key to national power, nor a neoconservative who believes that China should rely on military might to get its way. Rather, Yan argues, political leadership is the key to national power, and morality is an essential part of political leadership. Economic and military might are important components of national power, but they are secondary to political leaders who act in accordance with moral norms, and the same holds true in determining the hierarchy of the global order. Providing new insights into the thinking of one of China's leading foreign policy figures, this book will be essential reading for anyone interested in China's rise or in international relations. In a new preface, Yan reflects on his arguments in light of recent developments in Chinese foreign policy, including the selection of a new leader in 2012.
