A bilingual collection of work by one of the greatest French poets of the twentieth century.

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

Simon Ings' The Smoke is about love, loss and loneliness in an incomprehensible world. Humanity has been split into three different species. Mutual incomprehension has fractured the globe. As humans race to be the first of their kind to reach the stars, another Great War looms. For you, that means returning to Yorkshire and the town of your birth, where factories churn out the parts for gigantic spaceships. You're done with the pretensions of the capital and its unfathomable architecture. You're done with the people of the Bund, their easy superiority and unstoppable spread throughout the city of London and beyond. You're done with Georgy Chernoy and his questionable defeat of death. You're done with his daughter, Fel, and losing all the time. You're done with love. But soon enough you will find yourself in the Smoke again, drawn back to the life you thought you'd left behind. You're done with love. But love's not done with you.

To confront the demons of his past, author Johnny F. Pugh relives the year he spent as an army rifleman battling unseen guerrilla fighters in one of the most dangerous places during the Vietnam War, the Iron Triangle. Through his stories and poetry, he shows how it felt to be trapped in a kill zone, enemy bullets just inches from his face, and the mind-numbing terror experienced after being thrown by a land mine explosion while fighting off bloodsucking leeches, vicious mosquitoes, and stifling heat and humidity. Through Smoke-Torn Eyes offers an engaging, sometimes bilingual, account of the close friendship Pugh shared with his fellow squad members, learning from them critical survival skills and his own identity as a Chicano. After witnessing numerous atrocities against the Vietnamese peasants at the hands of the American military, he is forced to question his own role as a participant in this bloody war.

This memoir and manifesto—at turnstoughtful, raw, and even incendiary—offers an insider's glimpse into the spirits industry, from the country's foremost expert on sustainable, responsibly-sourced, and grower-produced spirits. Thaddeus Vogler is one of the most important people in the beverage industry today- a man on a mission to bring "grower spirits"—spirits with provenance, made in the traditional way by individuals rather than by mass conglomerates—to the public eye. By the Smoke and the Smell is Vogler's remarkable debut. This book will completely change the way Americans think about and buy spirits. Alternately humorous and heartfelt, Vogler's memoir will inspire readers not only to look at their liquor bottle's labels more closely, but also to seek out wonderful and wonderfully made products.
