The Survivors Club by Ben Sherwood | Waterstones

Ben Sherwood ? RELEASE DATE: Jan. 26, 2009. Sherwood ( The Death and Life of Charlie St. Cloud, 2004, etc.) investigates why some live, others don't. His subjects are the people who closely encountered the proverbial cement truck when they stepped out the door one sunny morning, yet lived to tell about it: the woman who dropped six miles through the sky without a parachute; the man who ejected from his fighter plane at sea level doing Mach 1; the woman who fell on her knitting needle ...

The Survivors Club Ben Sherwood - cdmx.truyenyy.com

Ben Sherwood does a solid job of homing in on what qualities and characteristics most everyone can muster to maximize their chances of survival when bad things happen. Through a range of examples and interviews with experts, he tells us not only what we need to do, but what we should ignore while working hard to stay alive.

Which is the safest seat on an airplane? Where is the best place to have a heart attack? Why does religious observance add years to your life? How can birthdays be hazardous to your health? Each second of the day, someone in America faces a crisis, whether it's a car accident, violent crime, serious illness, or financial trouble. Given the inevitability of adversity, we all wonder: Who beats the odds and who surrenders? Why do some people bound back and others give up? How can I become the kind of person who survives and thrives? The fascinating, hopeful answers to these questions are found in The Survivors Club. In the tradition of Freakonomics and The Tipping Point, this book reveals the hidden side of survival by combining astonishing true stories, gripping scientific research, and the author's adventures inside the U.S. military's elite survival schools and the government's airplane crash evacuation course. With The Survivors Club, you can also discover your own Survivor IQ through a powerful Internet-based test called the Survivor Profiler. Developed exclusively for this book, the test analyzes your personality and generates a customized report on your top survivor strengths. There is no escaping life's inevitable struggles. But The Survivors Club can give you an edge when adversity strikes.

The Death and Life of Charlie St. Cloud tells the haunting story of a young man who narrowly survives a terrible car wreck that kills his little brother. Years later, the brothers' bond remains so strong that it transcends the normal boundaries separating life and death. Charlie St. Cloud lives in a snug New England fishing village. By day he tends the lawns and monuments of the ancient cemetery where his younger brother, Sam, is buried. Graced with an extraordinary gift after surviving the accident, he can still see, talk, and even play catch with Sam's spirit. But townsfolk whisper that Charlie has never recovered from his loss. Into his carefully ordered life comes Tess Carroll, a captivating, adventuresome woman training for a solo sailing trip around the globe. Fate steers her boat into a treacherous storm that blows her back to harbor, to a charged encounter with Charlie, and to a surprise more overwhelming than the violent sea itself. Charlie and Tess discover a beautiful and uncommon connection that leads to a race against time and a desperate choice between death and life, between the past and the future, between holding on and letting go. Luminous, soulful, and filled with unforgettable characters, The Death and Life of Charlie St. Cloud is one of those rare, wise books that reveal the mysteries of the unseen world around us, gently transforming the worst pain of loss into hope, healing, and even laughter. Suspenseful and deeply moving, its startling climax reminds us that sometimes tragedies can bring about miracles if we simply open our hearts.

'...it should be made standard reading for those dealing with disaster/survival situations, it is also very informative in helping the general reader understand the psychology of survivors...The text makes compulsive reading and the book is hard to put down. It is worth examining, no matter where your professional interest lies.'" Duncan MacPaul, Nursing Times. Why do so many people die without need? How can an exceptional few survive extraordinarily harsh conditions sometimes after months or years of deprivation? Recent years have seen remarkable improvements in survival training and technology, yet most people still perish quickly in the face of adversity. In this book John Leach seeks to answer these questions by considering the psychology of human survival; how groups and individuals behave before, during and after life threatening events. Both short and long-term survival are addressed as well as the psychological consequences of hunger, thirst, cold, heat, crowding, isolation, fatigue and sleep deprivation. The essence of this work is distilled into a set of principles for psychological first-aid for use in the field.

"The incredible true story of Michael Bornstein--who at age 4 was one of the youngest children to be liberated from Auschwitz--and of his family"--

The classic guide to what makes people survivors, now in a revised and updated new edition. Who survives? Who thrives? As a psychologist who spent more than forty years studying the phenomenon of survival, Al Siebert gained valuable insight into the qualities and habits that help human beings overcome difficult situations--from everyday conflicts to major life stresses. In this revised and updated edition, he delineates the "survivor personality" and examines the latest research to show how survival skills can be learned, leading to better coping, increased success in work and relationships, and a vastly brighter outlook on the future.

This is the story of the greatest love, ever... J. J. Smith, Keeper of the Records for The Book of Records, is an ordinary man searching for the extraordinary. J.J. has clocked the world's longest continuous kiss. He has verified the lengthiest single unbroken apple peel. He has tasted the world's largest menu item. But J.J. has never witnessed great love. That is, until he comes to a tiny town in the American heartland. Here J.J. discovers a world record attempt like no other. Piece by piece, a farmer is eating a Boeing 747 to prove his love for a woman. But when J.J. unexpectedly falls in love with the same woman, a woman as outwardly cynical as he is, J.J. learns why records are made to be broken...and why the greatest wonders in life can never be measured.

Discover how human beings react to danger--and what makes the difference between life and death "Fascinating and useful . . . [shows that] the most important variable in an emergency is your own behavior."--The New York Times Today, nine out of ten Americans live in places at significant risk of earthquakes, hurricanes, tornadoes, terrorism, or other disasters. Tomorrow, some of us will have to make split-second choices to save ourselves and our families. How will we react? What will it feel like? Will we be heroes or victims? In her quest to answer these questions, award-winning journalist Amanda Ripley traces human responses to some of recent history's epic disasters, from the explosion of the Mont Blanc munitions ship in 1917--one of the biggest explosions before the invention of the atomic bomb--to the journeys of the 15,000 people who found their way out of the World Trade Center on September 11, 2001. To understand the science behind the stories, Ripley turns to leading brain scientists, trauma psychologists, and other disaster experts. She even has her own brain examined by military researchers and experiences, through realistic simulations, what it might be like to survive a plane crash into the ocean or to escape a raging fire. Ripley comes back with precious wisdom about the surprising humanity of crowds, the elegance of the brain's fear circuits, and the stunning inadequacy of many of our evolutionary responses. Most unexpectedly, she discovers the brain's ability to do much, much better--with just a little help.

From award-winning journalist Sherwood comes a fascinating exploration of survival that can help prepare you for life's inevitable struggles, from cancer and crime to car accidents and airplane crashes.
