This is a new edition of the classic textbook on marine protected area (MPA) management in the tropics, originally produced as an output of the Bali World Parks Congress in 1982. Approaches to planning and managing MPAs have evolved considerably. Major advances include innovative financing mechanisms, partnerships with the private sector and NGOs, and collaborative management between government and coastal communities. These advances have brought new approaches for MPA establishment and management that are more

participatory, involving communities through interaction and collaboration rather than prescription. With new case studies and illustrations, the guide comes in a water-resistant cover for field use. It is intended for those who plan individual and/or national MPA systems and gives philosophical context for MPAs along with some basic principles and approaches.

The 2nd Edition of The Spec Manual provides fashion

professionals and students with a -comprehensive guide for measuring garments using standard industry practices. This textbook/workbook contains front and back view croquis for women, off sizes, men, juniors, and children; spec sheet templates; illustrated measurement points; and tables with measurement points. The 2nd Edition also features a companion CD-ROM with electronic resources such as spec sheets and a flats library. Users with either beginning or advanced digital skills will learn how to create computer-generated spec sheets.
