2TOURISM AND POVERTYREDUCTION. of tourism can be important to those living in destinations, the rationale for this focus on economic effects is threefold. First, there already exists a huge amount of literature focusing on the anthropological, social and environmental impacts of tourism. Research exam- ining the economic effects of tourism on poor people is more limited and, hence, is in greater needs.

The empirical analysis indicates that tourism has a positive effect on poverty reduction and the concomitant inequality in the distribution of income among the poor could weaken the poverty reduction effect of tourism.

First Published in 2009. Routledge is an imprint of Taylor & Francis, an informa company.

Over the past decade, there have been an increasing number of publications that have analysed and critiqued the potential of tourism to be a mechanism for poverty reduction in less economically developed countries (LEDCs). This book showcases work by established and emerging researchers that provides new thinking and tests previously made assumptions, providing an essential guide for students, practitioners and academics. This book advances our understanding of the changes and ways forward in the field of sustainable tourism development. Five main themes are illustrated throughout the book: (1) measuring impacts of tourism on poverty; (2) the need to evaluate whether interventions that aim to reduce poverty are effective; (3) how unbalanced power relations and weak governance can undermine efforts; (4) the importance of the private sector's use of pro-poor business practices; and (5) the value of using multidisciplinary and multi-method research approaches. Furthermore, the book shows that academic research findings can be used practically in destinations, and how practitioners can benefit from sharing their experiences with academic scholars. This book was based on a special issue and various articles from the Journal of Sustainable Tourism.

Tourism is a key export for many developing countries, and this industry can play a significant role in promoting balanced sustainable development which generates benefits for poorer communities. This report reflects this concern by examining the contribution which tourism development can make to the elimination of poverty in developing countries, as well as making recommendations for action by governments, the industry, development agencies and local communities.

Poverty alleviation is high on the global policy agenda, its importance being emphasised by its place as the first of the United Nation's Millennium Development Goals. As a potentially significant source of economic growth in developing countries, tourism may also play a major role in poverty reduction and alleviation under the right circumstances. The incorporation of tourism into development policy and Poverty Reduction Strategies has special poignancy for those Least Developed Countries where natural resources exist to support a tourism industry and there are limited development alternatives. This book offers a holistic, explicit and detailed introduction to the relationship of poverty and tourism within the context of developing countries. The book is divided into distinct sections, progressing from an evaluation of the key concepts of poverty, tourism and development; to the causal factors of poverty; to the mechanisms of how tourism is being implemented in policy and practice to reduce poverty and finally to an analysis of the relationship between tourism to poverty alleviation in the future. The adopted analytical approach of the key themes is multi-disciplinary, incorporating tourism studies, human geography, political economy, economics, development and environmental studies. It integrates examples and original case studies from varying geographical developing regions including Africa, South Asian and East Asia and the Pacific, to lend practical insights into tourism's role in poverty alleviation. The text will be of particular interest to higher education students from tourism studies, geography, political economy, environmental and development studies, and sociology backgrounds. It will also be of relevance to government and policy makers, alongside those who have a more general interest in poverty alleviation.

The book offers a comprehensive and integrated approach to the topic of tourism development and its contribution to the fight against poverty. Tourism development is credited to be a powerful source of regional development and improvement in developing countries, and the focus of the book is on the world's poorest areas and how tourism connects to the poor and unlocks opportunities to escape the poverty trap. This book takes a comprehensive and unique approach by combining a decade of research on the effects of tourism development on poverty reduction in Latin America. The book explores poverty and its impact on development at the macro and micro levels. Then, it goes on to focus on tourism development and its effects on growth, inequality, and poverty reduction and how these dynamic relationships affect the most vulnerable groups of society. The research also documents on how the poor perceive tourism development on their lives and if they see it as an important vehicle to help them escape from poverty. Lastly, the authors map the conditions under which tourism can reach the poor and how tourism can offer opportunities for impoverished areas and their residents. Combining tourism dynamics, development economics, poverty reduction, business practices, and a sustainable perspective, the book takes a broad look at this important issue. The book will be informative and valuable to a higher educational audience, including academia and researchers, as well as practitioners, policymakers, and international organizations, and graduate students.

Inclusive Green Growth: The Pathway to Sustainable Development makes the case that greening growth is necessary, efficient, and affordable. Yet spurring growth without ensuring equity will thwart efforts to reduce poverty and improve access to health, education, and infrastructure services.

This book provides practical policy recommendations that are useful for developing Asia and for accelerating poverty reduction plans in the rest of the world. Poverty reduction in all its forms remains one of the greatest challenges facing humanity. In developing Asia, rapid growth in countries and sub-regions such as China, India, and Southeast Asia has lifted millions out of poverty, but progress has been uneven. On the other hand, the current coronavirus (COVID-19) pandemic and the global economic recession that it has caused are pushing millions of people back into poverty. Poverty reduction, inclusive growth, and sustainable development are inseparable, and poverty reduction is the premise for sustainable development. The Sustainable Development Goals (SDGs) are a bold commitment to finish what we started and end poverty in all forms and dimensions by 2030. However, because of the current global recession, the world is not on track to end poverty by 2030. Given the aforementioned situation, if we plan to achieve the no-poverty target in line with the SDGs, governments need to reconsider their policies and economies need to allocate their resources for this aim. Owing to the importance of the topic, this book provides several thematic and empirical studies on the roles of small and medium-sized enterprises, local businesses and trusts, international remittances and microfinance, energy security and energy efficiency in poverty reduction, and inclusive growth.

Endorsed by The International Ecotourism Society, Sustainable Tourism & The Millennium Development Goals: Effecting Positive Change demonstrates how ecotourism and sustainable tourism can assist in supporting and meeting the goals set forward by the Millennium Development Goals (MDG) and how it can foster a global partnership for development. The text discusses how ecotourism and sustainable tourism can assist in supporting and meeting the MDG by drawing on case studies and examples. The final summary chapter discusses how ecotourism and sustainable tourism can assist in supporting and meeting the MDG by 2015 and identifies the challenges and goals that need to be considered in the future. In this edition you will find: - Historical perspective of the development of ecotourism and sustainable tourism - The Millennium Development Goals defined - Overview of how ecotourism and sustainable tourism can assist in meeting the goals of the MDG - Engaging case studies and examples to reinforce the concept
