The incredibly moving and inspiring story about a quest to finally be heard. In *Underestimated: An Autism Miracle*, Generation Rescue's cofounder J.B. Handley and his teenage son Jamison tell the remarkable story of Jamison's journey to find a method of communication that allowed him to show the world that he was a brilliant, wise, generous, and complex individual who had been misunderstood and underestimated by everyone in his life. Jamison's emergence at the age of seventeen from his self-described "prison of silence" took place over a profoundly emotional and dramatic twelve-month period that is retold from his father's perspective. The book reads like a spy thriller while allowing the reader to share in the complex emotions of both exhilaration and anguish that accompany Jamison's journey for him and his family. Once Jamison's extraordinary story has been told, Jamison takes over the narrative to share the story from his perspective, allowing the world to hear from someone who many had dismissed and cast aside as incapable. Jamison's remarkable transformation challenges the conventional wisdom surrounding autism, a disability impacting 1 in 36 Americans. Many scientists still consider nonspeakers with autism—a full 40 percent of those on the autism spectrum—to be "mentally retarded." Is it possible that the experts are

wrong about several million people? Are all the nonspeakers like Jamison? Underestimated: An Autism Miracle will touch your heart, inspire you, remind you of the power of love, and ultimately leave you asking tough questions about how many more Jamisons might be waiting for their chance to be freed from their prison of silence, too. And, for the millions of parents of children with autism, the book offers a detailed description of a communication method that may give millions of people with autism back their voice.

Many biblical scholars treat the apostle Peter as a vague figure in the early church and regard the early tradition as something that cannot be trusted. In *Saint Peter: The Underestimated Apostle* Martin Hengel rejects the common minimalist view about Peter's role in the Scriptures and in the early church. Arguing that Peter is wrongly underappreciated, Hengel shows that Peter was, in fact, central to developing both the Jewish and Gentile Christian missions. / Though Hengel's work rests on meticulous scholarship, it is written in a manner that any interested reader will find clear and enlightening.

"From a black, gay woman who broke into the boys' club of Silicon Valley comes an empowering guide to finding your voice, working your way into any room you want to be in, and achieving your own dreams. In 2015, Arlan Hamilton was on food stamps and sleeping on the floor of the San Francisco airport, with nothing but an old laptop and a dream of breaking into the venture capital business. She couldn't understand why people starting companies all looked the same (white and male), and she wanted the chance to invest in the ideas and people who didn't conform to this image of how a founder is supposed to look. Hamilton had no contacts or network in Silicon Valley, no background in finance-not even a college degree. What she did have was fierce determination and the will to succeed. As much as we wish it weren't so, we still live in a world where being underrepresented often means being underestimated. But as someone who makes her living investing in high-potential founders who also happen to be female, LGBTQ, or people of color, Hamilton understands that being undervalued simply means that a big upside exists. Because even if you have to work twice as hard to get to the starting line, she says, once you are on a level playing field, you will sprint ahead. Despite what society would have you believe, Hamilton argues, a privileged background, an

influential network, and a fancy college degree are not prerequisites for success. Here she shares the hard-won wisdom she's picked up on her remarkable journey from food-stamp recipient to venture capitalist, with lessons like "The Best Music Comes from the Worst Breakups," "Let Someone Shorter Stand in Front of You," "The Dangers of Hustle Porn," and "Don't Let Anyone Drink Your Diet Coke." Along the way, she inspires us all to defy other people's expectations and to become the role models we've been looking for"--

This book introduces a new Human Factors concept that includes the air passenger as an integral part of the aviation system. It develops a revised Reason Model on Human Error that applies its principles to the prevention of passenger misconduct, with a focus on organizational issues affecting the interface between the air passenger and the airlines. It also builds a synergistic model addressing the traditional conflict between safety and service objectives. Incorporating a diffusion of air traveller tension, a Passenger Risk Management Model leads to a strategic approach for reducing incidents of Air Rage.

This book is a sound science report about the consequences of pesticides to nature, health and environment. The book shares essential insights into the use of pesticides in agriculture, discusses the politics, rhetoric and profits involved, addresses the potential health and ecological risks of pesticides in our daily lives, and debates possible solutions. Does sustainable agriculture exist, and is

agriculture without pesticides possible at all? Moreover, the author gives insight into his scientific work, the set-up of the experiments, and also writes about his very own experiences with the media and press after publication of his studies. For many years, Johann G. Zaller, an ecologist at the University of Natural Resources and Life Sciences in Vienna, and his team, have been researching applied chemicals and their effects on the environment. Their findings, together with relevant literature and media reports, are presented in this book, which offers a unique resource for anyone who wants to know the nature and background of pesticides and how we come into contact with them in our daily lives. Everyone is looking for power. Political campaigns play to the power of fear and hope; advertising agencies rely on the power of appetite, both wielding power by the means of words. But churches have something different and better. Churches have the gospel. Though we live in the world, we must not wage war like the world, or fight with its weapons. On the contrary, we have divine power to demolish strongholds. The gospel consists merely of words, but those words have the unexpected and underestimated power to create new life, to justify, to prepare a bride, to give the foretaste of glory. Christian conversion depends upon the underestimated power of the gospel. Authors Jonathan Leeman, R. Albert Mohler Jr., Thabiti Anyabwile, David Platt, Kevin DeYoung, Mark Dever, C.J. Mahaney, Matt Chandler, John Piper, and J. Ligon Duncan III call readers to herald a common

In the much anticipated follow-up to *Never Work Harder Than Your Students*, Robyn R. Jackson turns her attention to how school leaders can help any teacher become a master teacher.

The book explores the history of Justiniana Prima, a city built by Emperor Justinian I (527-565) in his birthplace near Niš in present-day Serbia. Previous studies focused on determining the city's location, underestimating the significance of analyzing written sources for the reconstruction of this city's genesis and importance. Using information from Emperor Justinian's Novels XI and CXXXI, as well as Book IV of Procopius of Caesarea's *De aedificiis*, Stanislaw Turlej endeavors to show that Justiniana Prima's historic significance resulted from granting its Church the status of an archbishopric with its own province in 535, which was independent of Rome. Justinian wanted to introduce profound changes to the ecclesiastical organization based on state law.
