Victimology: Theories and Applications introduces readers to the study of victimization, crime typologies, and the impact of crime on victims, offenders, and society at large. Each chapter provides a typology of the offender to analyze motivation, and includes an overview of the issues related to people who become victims of a wide variety of traditional and contemporary crimes such as child maltreatment, intimate partner violence, elder abuse, cyber crime and hate crimes. The history and theories of victimology are explored, as well definitive laws and policies, strategies for intervention, and future research areas.

A unique text/reader that takes a comprehensive, interdisciplinary approach to the study of criminology Providing an affordable alternative to the standard textbook, this new edition of the authors' popular text/reader provides instructors and students the best of both worlds – authored text with carefully selected accompanying readings. Now thoroughly updated with new articles, new content, and new statistics, tables, and figures, this Second Edition provides an interdisciplinary perspective on crime and criminality that incorporates the latest theories, concepts, and research from sociology, psychology, genetics, evolutionary biology, and the neurosciences. The new edition is divided into 15 sections that mirror chapters in a typical criminology textbook. New to This Edition: A new Section 11 on Mass Murder and Terrorism makes coverage of these high-interest topics even more accessible. Section 10 now focuses only on murder, rape, robbery, aggravated assault, and domestic violence, making it easier for students to absorb the material. New articles appear in the structural theories section, the sections devoted to violent crime, and throughout the text/reader as needed. The authors now more closely link sections on types of crime to sections on theory to give readers a more cohesive understanding of the connections between the two. Contemporary criminologists' favored theories (drawn from a survey of 770 criminologists) now appear in a table to give readers insight into the professional opinion today on criminological theories. Features: Each Section has a 15-page introduction (a "mini-chapter") that contains vignettes, photos, tables and graphs, end-of-chapter questions, and Web exercises, followed by three to four supporting readings. Theory Section introductions contain a unique table that compares and contrasts the theories presented, while theory concluding sub-sections focus on policy and crime prevention. A "How to Read a Research Article" guide (which appears prior to the first reading) illustrates key aspects of a research article. The book's readings are drawn from carefully selected, edited journal articles appropriate for an undergraduate audience.

'Focusing on key issues, themes and concepts within victimology, this edited collection provides an accessible and comprehensive critical analysis of crucial areas within victimisation. The main theories are related to, and integrated with, empirical research in an engaging style.' - Dr Anette Ballinger, Keele University 'This book achieves the rare feat of helping its readers without patronising them. The aids to the reader - tables, boxes, glossaries, questions, and suggestions for further reading - will prove genuinely helpful to students and their teachers, but they appear within a text that is theoretically informed as well as comprehensive and up to date in its coverage. It deserves to be widely read and used in the teaching of criminology, victimology, and criminal justice' - Professor David Smith, University of Lancaster, UK. Organized around the intersecting social divisions of class, race, age and gender, the book provides an engaging and authoritative overview of the nature of victimisation in society. In addition to a review of the major theoretical developments in relation to understanding aspects of victimization in society, individual chapters explore the political and social context of victimisation and the historical, comparative and contemporary research and scholarly work on it. Each chapter includes the following: - Background and glossary - Theory, research and policy review - 'Thinking critically about...' sections - Reflections and future research directions - Summary and conclusions - Annotated bibliography Victims, Crime and Society is the essential text on victims for students of criminology, criminal justice, community safety, youth justice and related areas.

With an author team led by Bonnie S. Fisher, one of the preeminent scholars in the field, Introduction to Victimology: Contemporary Theory, Research, and Practice is ideal for victimology survey courses at any level. This unique volume employs an integrated approach that focuses on theory, research, and practice. It covers a wide range of issues and also addresses unique topics such as victim decision making, fear of crime, and preventing victimization. FEATURES Incorporates relevant theory into the coverage of each key topic and connects the topics through theories that have developed over the past several decades Offers theoretical explanations for the causes and correlates of victimization, the reoccurrence of victimization, and domains of victimization Examines research across the main topics by discussing both classic and current studies Provides case studies and examples of victimology in practice, linking theory to practice and highlighting programs that have successfully addressed issues like prevention, mitigation of harm, and responses to victims and victimization Introduces students to current research in theory testing, discussing how accurate various theories have been shown to be "Spotlight on Theory," "Spotlight on Research," and "Spotlight on Policy" boxes offer in-depth looks at timely topics

White-collar crime costs the United States more than \$300 billion each year. It is surprisingly common, with one in every three Americans eventually becoming a victim. The criminals often dismiss these crimes as victimless, but those unfortunate enough to fall prey would disagree. An Introduction to Corporate and White-Collar Crime provides readers with an understanding of what white-collar crime is, how it works, and the extent to which it exists in our society. The broad-based coverage in this text analyzes the opportunity structures for committing white-collar crime and explores new ways of thinking about how to control it. Topics include: Theories behind white-collar crime, including social and psychological theories Routine activity, crime pattern, and situational crime prevention theories Laws that govern the securities industries, including the Securities Exchange Act and Sarbanes-Oxley Bank fraud, money laundering, racketeering, and organized crime Crimes involving public officials and obstruction of justice Control and prevention of white-collar crimes and sanctions for white-collar criminals The material is organized and presented in a logical fashion, with each chapter building from the previous content. Every chapter begins with objectives to help readers focus on the topic and concludes with review questions to test assimilation of the material and promote debate. Several chapters conclude with a practicum to facilitate real-world understanding of the material.

Victimology and crime prevention are growing, interrelated areas cutting across several disciplines. Victimology examines victims of all sorts of criminal activity, from domestic abuse, to street violence, to victims in the workplace who lose jobs and pensions due to malfeasance by corporate executives. Crime prevention is an important companion to victimology because it offers insight and techniques to prevent situations that lead to crime and attempts to offer ideas and means for mitigating or minimizing the potential for victimization. In many ways, the two fields have developed along parallel yet separate paths, and the literature on both has been scattered across disciplines as varied as sociology, law and criminology, public health and medicine, political science and public policy, economics, psychology and human services, and more. The Encyclopedia of Victimology and Crime Prevention provides a comprehensive reference work bringing together such dispersed knowledge as it outlines and discusses the status of victims within the criminal justice system and topics of deterring and preventing victimization in the first place and responding to victims' needs. Two volumes containing approximately 375 signed entries provide users with the most authoritative and comprehensive reference resource available on victimology and crime prevention, both in terms of breadth and depth of coverage. In addition to standard entries, leading scholars in the field have contributed Anchor Essays that, in broad strokes, provide starting points for investigating the more salient victimology and crime prevention topics. A representative sampling of general topic areas covered includes: interpersonal and domestic violence, child maltreatment, and elder abuse; street violence; hate crimes and terrorism; treatment of victims by the media, courts, police, and politicians; community response to crime victims; physical design for crime prevention; victims of nonviolent crimes; deterrence and prevention; helping and counseling crime victims; international and comparative perspectives, and more.

Victims of Crime 4/e includes newly contributed and updated articles utilizing the latest research and studies in the areas of violence, abuse, and victims' rights from experts in the field. It has a stronger focus on emerging issues and policies in the field of victimology than other comparable texts. Features/Benefits: - Utilizes the latest research and studies in the areas of violence, abuse, and victims' rights - Focuses on the emerging issues and policies in the fields of victim rights and crime prevention - The Chapter contributors represent some of the top scholars for each subject area. New to this Edition: - New 3 Part organization with the more common victimizing crimes first, followed by responses to victimizations, and then newer issues and types of victimizations in Part 3. - New chapters on human trafficking and cyber crime - Major expansion of the human services response and school victimizations. Updated throughout with new data and research.
