The sixth volume of trucks and cars used by Germany during WWII.

Sometimes achieving big things requires the ability to think small. This simple concept was the driving force that propelled the Volkswagen Beetle to become an avatar of American-style freedom, a household brand, and a global icon. The VW Bug inspired the ad men of Madison Avenue, beguiled Woodstock Nation, and has recently been re-imagined for the hipster generation. And while today it is surely one of the most recognizable cars in the world, few of us know the compelling details of this car's story. In *Thinking Small*, journalist and cultural historian Andrea Hott retraces the improbable journey of this little car that changed the world. Andrea Hott's wide-ranging narrative stretches from the factory floors of Weimar Germany to the executive suites of today's automotive innovators, showing how a succession of artists and engineers shepherded the Beetle to market through periods of privation and war, reconstruction and recovery. Henry Ford's Model T may have revolutionized the American auto industry, but for years Europe remained a place where only the elite drove cars. That all changed with the advent of the Volkswagen, the product of a Nazi initiative to bring driving to the masses. But Hitler's concept of "the people's car" would soon take on new meaning. As Germany rebuilt from the rubble of World War II, a whole generation succumbed to the charms of the world's most huggable automobile. Indeed, the story of the Volkswagen is a story about people, and Hott introduces us to the men who believed in it, built it, and sold it: Ferdinand Porsche, the visionary Austrian automobile designer whose futuristic dream of an affordable family vehicle was fatally compromised by his patron Adolf Hitler's monomaniacal drive toward war; Heinrich Nordhoff, the forward-thinking German industrialist whose management innovations made mass production of the Beetle a reality; and Bill Bernbach, the Jewish American advertising executive whose team of Madison Avenue mavericks dreamed up the legendary ad campaign that transformed the quintessential German compact into an outside worldwide phenomenon. *Thinking Small* is the remarkable story of an automobile and an idea. Hatched in an age of darkness, the Beetle emerged into the light of a new era as a symbol of individuality and personal mobility—a triumph not of the will but of the imagination.

Few cars have achieved the iconic status of Volkswagen's classic and much-loved Beetle – yet its origins are intertwined with the dark days of Nazism. This book looks at those origins, at the marque's initial post-war rescue by the British and the effect of early VW Director General Heinz Nordhoff's forward-looking desire to perfect one model rather than spread the company's talent over a range of designs, at the impact of radical-minded advertising campaigns and at the Beetle's never-to-be-beaten production record for a single model of nearly 22 million cars. Bringing the reader right up to the present day, marque expert Richard A. Copping recounts the Beetle's story in a lively and authoritative manner guaranteed to delight devotee and casual browser alike.

The world's most popular car, Volkswagen-or "the People's Car"-has earned its place in history. The VW Beetle chronicles the development and rise to worldwide popularity of the famed "punch-buggy," invented in Germany in the 1930s. This peculiar history includes the makings of all models, engines, and body styles through 1967-and the key people responsible for its development.

Bernhard Rieger reveals how a car commissioned by Hitler and designed by Ferdinand Porsche became a global commodity on a par with Coca-Cola. The Beetle's success hinged on its uncanny ability to capture the imaginations of executives, engineers, advertisers, car collectors, suburbanites, hippies, and everyday drivers across nations and cultures.

Ludvigsen traces the history of the Volkswagon Beetle, from its inception as a people's car for Hitler's Germany to its status as a beloved American icon, to the arrival of the New Beetle in 1998. He focuses on the car's creation, the industry-wide power struggle following the German defeat in World
