AN INSTANT NEW YORK TIMES BESTSELLER! A young entrepreneur makes the case that politics has no place in business, and sets out a new vision for the future of American capitalism. There‖s a new invisible force at work in our economic and cultural lives. It affects every advertisement we see and every product we buy, from our morning coffee to a new pair of shoes. ‖Stakeholder capitalism‖ makes rosy promises of a better, more diverse, environmentally-friendly world, but in reality this ideology championed by America‖s business and political leaders robs us of our money, our voice, and our identity. Vivek Ramaswamy is a traitor to his class. He‖s founded multibillion-dollar enterprises, led a biotech company as CEO, he became a hedge fund partner in his 20s, trained as a scientist at Harvard and a lawyer at Yale, and grew up the child of immigrants in a small town in Ohio. Now he takes us behind the scenes into corporate boardrooms and five-star conferences, into Ivy League classrooms and secretive nonprofits, to reveal the defining scam of our century. The modern woke-industrial complex divides us as a people. By mixing morality with consumerism, America‖s elites prey on our innermost insecurities about who we really are. They sell us cheap social causes and skin-deep identities to satisfy our hunger for a cause and our search for meaning, at a moment when we as Americans lack both. This book not only rips back the curtain on the new corporatist agenda, it offers a better way forward. America‖s elites may want to sort us into demographic boxes, but we don‖t have to stay there. Woke, Inc. begins a critique of stakeholder capitalism and ends with an exploration of what it means to be an American in 2021‖a journey that begins with cynicism and ends with hope.

It was the most brutal corporate restructuring in Wall Street history. The 2015 bankruptcy brawl for the storied casino giant, Caesars Entertainment, pitted brilliant and ruthless private equity legends against the world's most relentless hedge fund wizards. In the tradition of Barbarians at the Gate and The Big Short comes this riveting, multi-dimensional poker game between private equity firms and distressed debt hedge funds that played out from the Vegas Strip to Manhattan boardrooms to Chicago courthouses and even, for a moment, the halls of the United States Congress. On one side: Apollo Global Management and TPG Capital. On the other: the likes of Elliott Management, Oaktree Capital, and Appaloosa Management. The Caesars bankruptcy put a twist on the old-fashioned casino heist. Through a $27 billion leveraged buyout and a dizzying string of financial engineering transactions, Apollo and TPG‖in the midst of the post-Great Recession slump‖had seemingly snatched every prime asset of the company from creditors, with the notable exception of Caesars Palace. But Caesars‖ hedge fund lenders and bondholders had scooped up the company‖s paper for nickels and dimes. And with their own armies of lawyers and bankers, they were ready to do everything necessary to take back what they believed was theirs‖if they could just stop their own infighting. These modern financiers now dominate the scene in Corporate America as their fight-to-the-death mentality continues to shock workers, politicians, and broader society‖and even each other. In The Caesars Palace Coup, financial journalists Max Frumes and Sujeet Indap illuminate the brutal tactics of distressed debt mavens‖vultures, as they are condemned‖in the sale and purchase of even the biggest companies in the world with billions of dollars hanging in the balance.

In his bestselling book Why Christianity Must Change or Die, Bishop John Shelby Spong described the toxins that are poisoning the Church. Now he offers the antidote, calling Christians everywhere into a new and radical reformation for a new age.
