In the 1960s and 1970s, John Deere ' s tractors evolved dramatically from small machines into large, powerful tractors with modern advances and muscular engines; it was a period of the greatest changes since the 1920s. Deere christened these tractors the New Generation. This book in the Tractor Legacy series examines these Big Green machines in detail, with archival and current photography of restored tractors, a thorough historical text, and details of model specifications and variations.

Originally published in 1986, this book subverts an attitude towards the moral dimension of life which the author terms 'ethical cynicism'. It discusses a theory of moral powers - a theory which shows that moral values are immensely potent sources of power. The author argues that there is a conceptual affinity between the Wittgensteinian account of language and the Marxist theory of history such that the two complement and even require one another in various aspects.

The story of how diesel engines and gas turbines, used to power cargo ships and jet airplanes, made today's globally integrated economy possible. The many books on globalization published over the past few years range from claims that the world is flat to an unlikely rehabilitation of Genghis Khan as a pioneer of global commerce. Missing from these accounts is a consideration of the technologies behind the creation of the globalized economy. What makes it possible for us to move billions of tons of raw materials and manufactured goods from continent to continent? Why are we able to fly almost anywhere on the planet within twenty-four hours? In Prime Movers of Globalization, Vaclav Smil offers a history of two key technical developments that have driven globalization: the high-compression non-sparking internal combustion engines invented by Rudolf Diesel in the 1890s and the gas turbines designed by Frank Whittle and Hans-Joachim Pabst von Ohain in the 1930s. The massive diesel engines that power cargo ships and the gas turbines that propel jet engines,

Smil argues, are more important to the global economy than any corporate structure or international trade agreement. Smil compares the efficiency and scale of these two technologies to prime movers of the past, including the sail and the steam engine. The lengthy processes of development, commercialization, and diffusion that the diesel engine and the gas turbine went through, he argues, provide perfect examples of gradual technical advances that receive little attention but have resulted in epochal shifts in global affairs and the global economy.

Already a much loved classic in Austria, "Tante Jolesch or the Decline of the West in Anecdotes" is Friedrich Torberg's tribute to the Jewish coffee-house world that flourished in Vienna in the afterglow of the Austro-Hungarian Empire until its final collapse in 1938. Based on Torberg's personal memories of intellectuals and eccentrics of the time, including Egon Friedell, Fritz Grünbaum, Egon Erwin Kisch, Alfred Polgar, and Franz Werfel, this work evokes the storytelling and humour prominent among Vienna's coffee-house denizens. These anecdotes allow one to see into the lives of assimilated Jews before the Shoah, beginning in the living room of Tante Jolesch, revolving around the coffee-house, and extending to summer resorts, sports matches, dinner parties, a psychiatric clinic under the care of Sigmund Freud, and the office of a U.S. consular official in charge of granting visas to the United States. In this volume, Torberg builds a literary monument to a group of people, a time, and a culture of which he saw himself as one of the last representatives. Despite being one of the most prominent Austrian literary figures of the twentieth century, Friedrich Torberg is not well known in the English-speaking world. He joined the literary elite of pre-war Austria at the age of twenty-two, but his career was cut short by the Nazi ban on Jewish writers. Invited by the New York PEN Club as one of "ten outstanding German anti-Nazi writers", Torberg was able to flee to the United States where he wrote screenplays and articles for German-language newspapers. In 1951 Torberg returned to Vienna, where he became a journalist, critic, and translator. In 1979 he received the Austrian State Prize for Literature.
